Grill mat by BBQ Shield

Summer is fast approaching and so is grilling season. BBQ Shield, has launched a new grilling accessory that was designed to make grilling a fun and exciting activity.

(Newswire.net -- May 27, 2015) Louisville, KY -- Grilling is an age old tradition in America. Our forefathers used to grill their meat before they started frying and stewing. Grilling has evolved, however, into being a full-on activity, an event even. Most Americans pull out their grills during special occasions such as family reunions, football games, house parties, Memorial Day, July 4 and more.

The new grilling accessory provided by BBQ Shield makes grilling easy and safe which gives women more freedom to get involved in grilling this summer. With these accessory, grillers can be sure to eliminatethe likelihood of experiencing certain mishaps.

Fire flare-ups are perhaps the most hazardouscatastrophes that occur while grilling. This occurs simply with the dripping of grease or liquid from the food into the open fire of the grill. In many instances, these flare-ups cause scorching on the arm, and in some instances the fire gets so high that it scorches the face or even eyebrows.

The BBQ Shield Grill Mat, designed with 150% more thickness than its cheaper alternatives, stands up against heat of up to 500 degrees Fahrenheit. It is a non-stick mat that provides a smooth surface on grill grates which help to slow cook meats and vegetables without causing charring.

The grill mat also prevents the occurrence of cross-contamination. It prevents food from touching grill grates that could have been laden with germs, bad bacteria and pathogens during storage. The company has assured that the mats would not harbor the buildup of germs, bacteria or even food residue due to the quality PFOA-free Teflon-like material used to make the mats.

Although this new accessory prevents from mishaps while grilling, it does not take away from the entire grilling experience. Unlike some other grill mats on the market, the BBQ Shield grill mats provide the grill lines on food and allow the same tasty grilled taste as if it were bare grill.

One user, Vicki A., reviewed, " [BBQ Shield grill mats are] great for grilling veggies, fruit and seafood! Super easy to clean, just a swish with a soapy sponge and rinse with hot water. These mats are also useful when grilling on public grills in parks and campsites. You no longer have to worry about the old gunk getting on your food.

Summer has been deemed grilling season. More Americans have been proven to pull out their grills during the summertime. With this in mind, BBQ Shield released their set of grill mats to the market via the powerful online portal Amazon.

About Paisley Road Product

BBQ Shield, sold by Paisley Road Products and fulfilled by Amazon.com improves the enjoyment of preparing grilled food. The non-stick surface prevents loss of food through the grates and reduced flare-ups which can burn the food.
