DIY Pest Control Helps the Do-It-Yourselfer Rid Their Property of Pests

Carl Staffel August 04, 2015

DIY Pest Control

With DIY Pest Control equipment and products, people can rid their properties of indoor and outdoor pests including bed bugs, termites, flying insects, crawling insects, and much more.

(Newswire.net -- August 4, 2015) Houston, TEXAS --Rather than rely on an expensive extermination company, do-it-yourselfers can now depend on DIY Pest Control Power to provide them with the tools and products needed to eliminate various unwanted guests. Indoor and outdoor products include baits, sprays, and safe-to-use insecticides. A range of gels, dusts, baits, traps, and aerosols safe for use around pets and on the mattresses customers sleep on are available in our online catalog.

All major brands of DIY pest control items are sold. The main shopping site offers Featured Products but its main sections are Indoor Stuff, Outdoor Stuff, and Green Stuff. Outdoor items effective on lawns, patios, and backyards include ant bait, cockroach gel, spider and scorpion insecticide, and a range of other dusts and insecticides. An extensive range of Green Products are safe for interior and outside environments while effectively doing their job at killing insects.

Providing Top-Notch DIY Pest Control for Bed Bugs

Bed bugs are a nuisance. They continue to proliferate across the country and can transmit diseases. The company offers various items to combat the problem, including bed-bug-blocking top mattress fabric. It also supplies a bed bug detector that attracts the pests, alerts of their presence, and helps to deter them from returning. In addition, a number of sprays, dusts, concentrates, and aerosols are available.

Calvin Thigpen of DIY Pest Control Power, said, “We know the struggles customers go through in finding good pest control companies. Going one step further, we supply the products needed to rid properties of any pest at an affordable price. From cockroaches to rats, mosquitoes to bed bugs we cover the full range of uninvited guests.”

Eliminate All Kinds of Pests

The company makes it simple to find products based on the type of bugs around. Sections include items for scorpions and spiders, springtails, termites, and flying insects. Even DIYers can rid their properties of bees, wasps, flies, mosquitoes, grasshoppers, moths, and others.

Crawling insects also plague homes. From ants to cockroaches, centipedes to crickets, DIY Pest Control Power can supply the appropriate items to deal with the problem. Even if there are mice, rats, opossums, raccoons, snakes, or skunks present, the company can assist customers with the right products. These make homes uninhabitable to those creatures.

Industry Leading Equipment and Customer Service

The choices go beyond simple aerosol sprays and bait traps. The company supplies leading spray and dust equipment, nitrile chemical resistant gloves, and even professional bee suits. Customers can therefore find a full range of items to meet their needs without consulting an extermination company. Everything can be purchased using the secure shopping cart.

In ridding their property of pests, customers can also find sales on the DIY Pest Control website. Free shipping is available on all orders delivered in the Continental U.S. Customers also have the option of joining the Discount Club to receive 5% off on their purchases. Also, all products come with a 110% price guarantee.
