Eric Foster The HD Group / BHIP Global

The U.S. economic crisis stubbornly continues its impact on families, with unemployment back to 7.5% and further talks into military retrenchments. Though the home - based business and start – up statistics continue to rise.

(Newswire.net -- May 8, 2013) Mesa, AZ -- As thousands of Americans continue to battle a total loss of income, increasing personal debt and diminishing balances in their 401K, many families have turned to home based business opportunities. There is however no shortage of home – based business opportunities, especially those that clearly are not.

During a recent “Second Income” seminar held by The HD Group, a senior BHIP Global Distributor, 40 people were asked by Business Mentor, Eric Foster, how many attendees had more than one income, if any at all. The majority of the group responded with the resulting combined score of a low 23%, revealing limited future income opportunities for those concerned.

In a recent interview with Brian Savic, from [IrevealTV](#), Eric Foster replied to the question; “How can you help people learn another skill, or earn a second income without the required experience?” With the following statement; “When I was an Army Medic, we were also a single income family and I knew that was not going to cut it once the kids came. I myself struggled and since have learnt and helped other people learn how to build their own home based businesses and continue to benefit from multiple incomes.”

Foster went on further to say, "The secret is finding the right combination of quality products, team support and a company focused on their consumers, which is what I finally found in [BHIP Global](#)." The frustrating thing says Foster; “Is that while we are genuinely helping people transform their health and wealth, with patented products, such as AC – 11 DNA Repair, there are many people peddling inferior products and empty promises. Thereby leaving people in much need of help, confused and non-committal, when presented with a genuine opportunity. In aid of the right information reaching people who are interested in a second income, we are providing 100 opportunities for mentoring to candidates in our 'I Just Retired' campaign."

[The HD Group](#) is a Senior BHIP Global Distributor that was founded by a core group of very successful and visionary entrepreneurs. They have helped build and launch companies that have gone on to millions of dollars in sales. The belief in success attracts success, alongside the importance of working with quality professionals with the same determination, has allowed them to attract top level leaders, executives, & professionals from all industries. They have recently found the biggest venture to date in launching the North America and South America markets for the next global powerhouse.
