

Leading USA PVC Sheet Manufacturer Acquired

Hayden Hess April 13, 2014

One of the American leading PVC Sheet suppliers has been purchased by Simona AG. Boltaron Performance Products, LLC of Newcomerstown, OH.

(Newswire.net -- April 13, 2014) Anaheim, CA -- Boltaron Performance Products, LLC of Newcomerstown, OH, USA has been a leading American manufacturer and producer of quality high-value thermoplastic sheet materials. Boltaron has been known for the wide range of plastic sheet materials for thermoforming and fabrication

of critical high performance plastic components. The most common applications of these materials are aircraft interiors, building products, mass transit vehicle interiors, and a wide range of general purpose commercial products.

Boltaron Was Pursued For Several Years

The acquisition of Boltaron Performance Products was announced by Wolfgang Moyses, CEO of Simona AG. Boltaron will become the newest member of the **SIMONA AMERICA Group**, the parent company of SIMONA AMERICA, Inc., Laminations, Inc., and also Boltaron, Inc. "We have pursued this acquisition vigorously over several years due to the strategic fit of Boltaron with both SIMONA AMERICA and Laminations," explains Moyses. He also shared, "Each of these companies commands a significant share of the different market, but collectively they span the entire market with high-volume commodity grades up to the high-performance aerospace grades. We have been impressed with the brand recognition, market penetration, operational excellence and profitability of Boltaron and we believe when combined with SIMONA, Boltaron can achieve even greater results."

Boltaron Performance Plastics specializes in PVC sheets and PVC alloys. Laminations Inc. is a leader in high tech plastics that meet the FM-4910 fire ratings, including PVC, Polypropylene and Kynar PVDF sheet materials. Simona America produces a wide range of HDPE sheet, Polypropylene Sheet and extruded PVC sheet at their plant in Hazleton, PA.

Boltaron Capacity Key To Acquisition

Boltaron Performance Products has been the only North American company to produce products using extrusion, calendaring and press lamination all under one roof. Boltaron can produce the [widest thickness range of PVC plastic sheeting](#) in the industry, from .003" to 4.0" thickness. They also possess the capacity to produce sheet of multi-layer composites, which can provide a broad range of physical properties.

PVC Sheet and PVC Compounds a Specialty

One key to the Boltaron success is the extreme proficiency in producing PVC Sheet and PVC Alloys and Composites. These materials generally carry very high flame resistant ratings, and some of Boltaron's materials carry the highest ratings available from UL. Some of the most common PVC materials are the [Type 1 Gray PVC Sheet](#), Type 2 PVC Sheet, Clear PVC Sheets, CPVC Sheet materials. Much like a standard sheet of plywood, PVC sheet materials are normally produced in 48" X 96" sheets.

PVC sheet materials are common building materials, and can be bonded and fabricated to produce a wide range of commercial and industrial products. Contact **Industrial Plastic Supply, Inc.** of Anaheim, California for the complete line of PVC Sheet and Sheeting.
