We always use a high-grade cleaner and professional top range squeegee's and washers", he concludes.

When having your windows washed its essential you get a professional Window Cleaner in to do the job right. Here are a few points to keep in mind when hiring any window cleaner to wash your windows:

1. He should take a thorough look around the home or premises to determine the hazards and the state of the windows needing a wash.
2. Give a quote that takes into account the number of windows and the length of time needed to complete the job.
3. Use proper equipment such as safety ladders and telescopic poles for higher hard to reach windows.
4. Ensure windows are washed and hosed before a squeegee is applied to prevent glass from scratching.
5. Use only top grade [window cleaning](#) equipment to ensure a complete thorough clean of the windows, such as Ettore. Many get it wrong to start with by using a cheap squeegee, states Michael.
