([Newswire.net](#) -- October 11, 2014) Beaverton, OR -- It's been nearly a month since that first positive feedback from a very happy customer was posted on the Amazon page of the Loopy Apple spiral slicer. The phenomenal increase in five-star reviews dedicated to this handy kitchen tool has been nothing short of an impressive feat for a small trading company like Ibiza P/L.

A brief, but concise analysis of all user-generated comments from August 21 to September 10, 2014 reveals many important details about this versatile kitchen tool. Many customers noted that this hand-held spiral slicer has a hollow body that's constructed out of solid and durable synthetic materials. It looks like an hourglass with top and bottom cones. It takes up very little storage space in your kitchen drawer. It's also a useful tool to bring with you on a camping trip.

It's generally safe and easy to use, according to customers who have tried it. Simply attach that small piece of vegetable or fruit onto the short, plastic spikes inside the rotating cap of the [Loopy Apple spiral slicer vegetable](#). Turn the cap and the slicer in opposite directions to peel or slice a carrot or potato in a continuous roll. This kind of stability also cuts or juliennes the vegetable into evenly measured strips of either 2 x 3 or 3.5 x 5 square millimeters thick.

The sharp, single-edge blades are made of strong stainless steel that won't rust or become dull, so quickly. The notched blades extend a bit farther inside the slicer at a very slight angle. This diagonal design of the blades makes this tool completely safe to handle. While most of the customers used the slicer to make toppings and garnishes for salads and soups, a few people have suggested creating veggie "spaghetti" noodles from green and yellow zucchinis.

To see other ways of cutting your food, hold the eggplant or radish tightly with your thumb and four fingers as you slowly twist and turn the vegetable inside the slicer. At the same time, move it back and forth under the serrated blade. This push-turn-pull combination creates paper-thin strips of root crops and salad vegetables with a zigzag or slightly curvy shape.

When it's time to clean up the mess in the kitchen, this handy spiral slicer vegetable by Loopy Apple doesn't need to be disassembled for a thorough washing. Run it through the dishwasher in hot water or use the complementary cleaning brush with short, firm bristles to remove food residue from the blades and inside the slicer.
