Car accident injuries are still a significant cause of death for children in the United States, however many reported deaths could have been avoided if parents were effectively informed on ways to safeguard their kids while out on the road.

(Newswire.net -- October 28, 2014) Las Vegas, NV -- With child accident injuries still on the up, professionals criticize moms and dads who refuse to understand that buckling youngsters in appropriate sized car seats, car seat, and seat belts will certainly reduce the opportunity of a major and fatal injury in a traffic relevant accident. Current data expose that when a car seat is utilized, the opportunity of death in passenger vehicles is greatly reduced for babies aged under 1 year by 71 %; and for the 1 - 4 year age by 54%.

Further United States statistics expose that during 2011, over 650 kids aged 12 years or more youthful died as travelers in automobile accidents, with over 148000 youngsters being hurt. An additional research study discovered that in simply one single year, over 618000 youngsters aged as much as 12 had been an automobile guest without having used a youngster safety seat, a car seat or a seat belt a minimum of once, which 33 % of the children who died in a crash in 2011 had not been buckled up.

Another risk for kids riding in a youngster safety seat is the possible risk of getting burned, but this time by the sun. The summer sunlight has actually asserted numerous young victims this year with guides being available in from up and down the country about young children and infants getting burned, after being placed into a hot vehicle safety seat by their

parents. A current Japanese medical research study about safety seat security exposes that direct sunlight can warm a kid's safety seat by as much as 149 degrees.

Accessory device market expert Mr Neil Speight states that lots of moms and dads are simply unaware of the threat when leaving a car parked in direct sunshine. He said... "The primary trouble is that babies and little ones are commonly simply unable to interact their discomfort with parents, and crying may just not be enough to get their attention."

Mr Speight explained how his Nevada based company "Freddie and Sebbie" were assisting to inform moms and dads about kid safety seat awareness, and stated... "Our Amazon customer support group are addressing parents concerns about youngster safety in automobiles daily, with numerous concerns about age and size constraints for car safety seats, car seat and seat belts. So I would state that in spite of the reports, there is a genuine issue today by American moms and dads for the safety of their youngsters's welfare, it's simply a case of keep getting the message out to them as much as possible.

Neil, a daddy a 4 himself said... "The sun can be the reason for really nasty burns, so I would definitely advise the use of a car seat sunshade to help protect kids from getting burned, either by the hot buckles or by an extremely hot vehicle safety seat. The **Freddie and Sebbie car seat sunshade** has actually been designed to cool and protect an automobile safety seat, and is incredibly simple to set up."
