[Dr Pete Premium Lean Diet Supplement](#) is the first product in the Dr Pete Ultra range to be offered with a huge discount rate. Made of a special blend of ingredients that research has shown to provide the best and most effective fat burning properties, this diet supplement boosts one's metabolic rate and suppresses appetite, a combination that gives a strong head start to losing weight quickly.

One of its ingredients is Synephrine, a metabolic enhancer that serves as a stimulant and helps in breaking down fat while boosting the adrenaline system. Aside from stimulating fat metabolism, it increases caloric expenditure, creates a sense of well-being and boosts energy, often providing an effect similar to caffeine. Another power player in its list of ingredients is Yohimbine, which serves as an alpha-2 receptor blocker that blocks fat cells around the hips from developing and helps burn this fat. Its effects are clearly seen in the rave reviews and positive feedback it received from various customers.
