**Top Dog Nutraceuticals has released their hip and joint supplement which is believed to extend the life of many canines suffering from the degenerative disease.**

(Newswire.net -- December 16, 2014) Lake Mary, FL -- Arthritis in dogs is a chronic

illness faced by dogs as they get older, which can reduce their life span if left untreated. Top Dog Nutraceuticals, in recognition of this fact, has released their hip and joint supplement which is believed to extend the life of many canines suffering from the degenerative disease.

While it is a well-known fact that dogs do not die directly from the different types of arthritis, its debilitating effects can seriously affect hip and knee joints in dogs as it does in humans. These symptoms affect the mobility of the animal and can result in severe pain and other complications which may lead to the dog's early death or euthanasia by its owner. This likelihood increases as dogs get older but the disease may manifest itself earlier in some kinds of dogs.

The [dog arthritis pain relief supplement from Top Dog](#) is suitable for all dogs with arthritis, regardless of their age and level of pain being experienced. This is said to be as a result of the unique blend of high quality ingredients the product contains. Its 120 chewable tablets are made up of glucosamine and chondroitin, which are found in healthy cartilage, along with manganese, which aids in the overall health and mobility of joints in pets. In addition, the product contains turmeric, a renowned herb that has multiple health benefits, including its ability to act as a natural anti-inflammatory agent that reduces pain.

"I am enjoying seeing my 2 older dogs enjoying life again! After only a few days of giving these high quality supplements to my dogs, I noticed a huge difference in how well they were moving around and their desire to play again," said Linda Ann Withrow, a verified Amazon reviewer.

By helping arthritic dogs to regain mobility, their life expectancy is believed to improve and the dog arthritis pain relief supplement from Top Dog is said to do just that, according to the feedback received. Shoppers looking for a [proven dog arthritis pain relief product](#) to help extend the life of their arthritic dogs may consider this supplement based on customer reviews. It is currently available on Amazon.
