

Advanced Dentistry Announces \$1000 Off invisalign

David Nicoll January 28, 2015

Get the smile you deserve.

The company offers a free Invisalign consultation for Las Vegas residents to discuss treatment options for 'getting the smile you deserve'

(Newswire.net -- January 27, 2015) Las Vegas, NV -- Believing one should “get the smile they deserve” Dr. Lazar and the team at Las Vegas' Advanced Dentistry would like to announce that for a limited time they are now offering **\$1,000 off invisalign** corrective treatments with free consultations for the corrective procedure.

Invisalign is a teeth straightening procedure that uses clear plastic removable appliances in a graduated series to straighten teeth. No wire brackets or rubber bands are required.

The aligners are made from medical grade plastic and provide a comfortable, almost unnoticeable fit. They are convenient because they have no permanent brackets or wires, there's no need to be self-conscious wearing them and the patient may eat whatever they want while they are undergoing the procedure, because they can be removed to eat and clean your teeth.

“My husband and I have been regular patients of Advanced Dentistry for more than 4 years now,” began Yelp reviewer Leah B. “Dr. Steve Lazar is a very soft-spoken professional who takes time to talk with us every time we visit the clinic. He treats us like friends and not just a patient in his clinic. He always makes us feel that we are very important and that our opinion matters.” About the office, she continued, “The office is very clean & equipped with state-of-the-art technology. Over the years, we observed that they have upgraded/improved their equipment which gives us the assurance that we get the latest & best service. All the staff are courteous & friendly.”

Located in South West Las Vegas, [Advanced Dentistry](http://AdvancedDentistry.com), the office of Steve Lazar DMD, is a full-service Cosmetic Dental Practice. Dr. Lazar and his staff care deeply about providing patients with a pleasant, stress free experience and use only the most advanced, state of the art equipment and techniques designed to avoid the pain and discomfort of dental experiences.
