

# Organic Kale Powder, fujiKale™, Arrives in the US

David Jahr April 09, 2015

100% USDA organic kale powder from Japan.

From the ideal growing climate of Shimane, Japan, comes fujiKale™, an organic kale powder now available for the first time in the United States.

(Newswire.net -- April 9, 2015) Torrance, California -- For more than 10 years, fujiKale™ (known in Japan as “Q'SAI Kale Aojiru”) has been one of Japan’s leading kale powders, which is a pure, concentrated, and convenient additive that can be incorporated into virtually any recipe. Now, fujiKale is available in the US.

## *100% Pure Organic Kale Powder*

Q'SAI USA is committed to the highest levels of farming and cultivation of organic kale, which is USDA certified organic standards. There are no chemical additives, pesticides or fertilizers used in its cultivation.

## *Patented Process*

fujiKale benefits from a patented process (Japan Patent No. 5214089) that is able to produce an ultra-fine powder with high and consistent solubility without any additives. Most vegetable powders add a sugar, starch or other ingredient to help the powder mix with liquids. But fujiKale doesn't have any additional additives and yet dissolves well into liquid without lumps. fujiKale is 100% pure organic kale powder.

## *Concentrated Kale Superfood*

- One cup of chopped kale (70 grams) equals one scoop (5g) of fujiKale. One scoop of fujiKale is the equivalent to one whole serving of vegetables.
- One serving of fujiKale has 140% of the USDA recommended amount of Vitamin K, an essential vitamin to support cellular health.
- One serving of fujiKale contains 35% of the recommended daily allowance of vitamin C.
- fujiKale is also a good source of calcium providing 10% of the recommended daily allowance with every serving.
- fujiKale has only 15 calories per serving.
- Packed with antioxidants, fujiKale provides comprehensive support for the body’s detoxification system and helps neutralize free radicals in the body. The kale’s flavonoids combine both antioxidant and anti-inflammatory benefits in a way that gives kale a leading dietary role to support avoidance of inflammation and oxidative stress.
- fujiKale is an excellent source of folic acid, which has been shown to have numerous health benefits, including supporting a healthy pregnancy.

## *Super-Convenient Superfood*

- fujiKale supports health with a pure source of vitamins and minerals including vitamins A, B, C, and K and is a source of protein, calcium, iron, potassium and magnesium as well as omega-3 fatty acids.
- The fibrous leafy green vegetable can be a difficult incorporating into recipes. But fujiKale is a fine powder that can easily dissolve in liquids and foods.
- Can be added as an ingredient to a variety of dishes, smoothies and other recipes. **Recipe book is available upon request.**
- fujiKale’s manufacturer has conducted scientific studies to identify health benefits of kale, which is used in the formulation of fujiKale, including anti-allergic effects, anti-obesity effects, alleviating diabetes, enhancing immunopathy associated with smoking tobacco and more. **Studies available upon request.**

## **IDEAL CLIMATE FOR KALE**

Kale that is grown for fujiKale is nurtured in the rich soils of Shimane Prefecture, on the main island of Honshu, in southern Japan where the climate is as follows.

- The area has a humid subtropical climate and it has hot humid summers and relatively mild winters. The area

also sees on average about 1,600 mm (63 in) of precipitation per year, with a stretch of more intense precipitation between the months of June and September. Its average temperature is 16.3 °C (61 °F), 70% humidity. Roughly 40% of the year is cloudy.

- Winter temperatures rarely drop below freezing (0 °C, 32 °F) and it rarely snows. Spring is warm and sunnier. Summer is hot and humid. Autumn is mild and dry.
