The baby drawers organizer comes with five detachable sections. These can be used separately within the same drawer or throughout different drawers or closets in the same house. This makes the set highly practical for other purposes around the house such as organizing makeup, the kitchen drawer, storage in the bathroom drawer and even the garage.

The drawer organizer set is said to be so versatile that although it was designed for office spaces to be used as office organizer drawers, it has become popular for usage at home. While giving the office organizer drawers a five star rating for quality, one verified purchaser Melissa Wilson Doss commented, "This drawer organizer set is so great!! My kitchen junk drawer needed some serious organization! I used 3 of these in that drawer alone...now I just have to instruct my hubby and kids to keep it neat. Since these are detachable and can be used separately, I was able to use the remaining 2 in my craft area. These drawer organizers are perfect for just about anything - office supplies, hair accessories in the bathroom, etc. They are sturdy and durable. It seems like they would be easy to clean as well. I would definitely recommend this product to others!"

The sections of the baby drawers organizer come in a variety of sizes to accommodate different sized items. The color of the organizer is white, however, it is easy to clean with warm water and soap. Additionally, due to the quality of the frames' material, this home and office storage accessory can last for a long time before wear and tear. This material, the company guaranteed, is strong and durable.
