Multiplication Flash Cards

Simply Clever Cards have announced the release of an ingenious set of arithmetic cards that is innovative for this current generation of children.

(Newswire.net -- September 4, 2015) Saratoga, FL -- The multiplication flash cards provide a positive educational experience that is suited to assist children in practicing their basic mathematics skills.

The multiplication flash cards offer a learning experience that can improve student's memory and comprehension as it relates to arithmetic. According to Simply Clever Cards, the simplest way to get children more interested in learning is by making it fun. The company also stated that they acknowledged recent studies which showed that stimulating the pleasure center in the brain while the learning process was being carried out was a key to success. Additionally this type of engaging learning experience is what can assist in the improvement of understanding and remembrance of key principles in Mathematics.

This deck of [multiplication flash cards](#) was designed for children aged 7 years and older . It can be utilized in the classroom by teachers as a learning aide. Additionally it can be useful to parents as a homeschooling resource. The flash cards make learning arithmetic fun and easy. According to Simply Clever Cards, unlike similar products that can be boring to use, these multiplication flash cards are interactive for children to practice their mathematics. Additionally, it can be used to play regular card games such as War, UNO, Crazy Eights, Old Maid, Go Fish and Memory. This is possible because the deck comes with the normal fifty two cards. However these are numbered from zero to twelve in four distinct colors with an additional four cards as jokers. This makes the cards a versatile deck able to offer different avenues for entertainment while enhancing learning.

The [multiplication flash cards](#) by [Simply Clever Cards](#) aid students in practicing their basic mathematical skills with the common core standards of addition, subtraction, multiplication and division. The arithmetic cards also enable the user to enhance skills in number comprehension. Additionally fractions can be taught in an intuitive and fun way.

The color of the multiplication flash cards lend to a better ease of use. Parents and teachers alike realize that the colors can also benefit to the contribution of the catching of interest of children in their learning environment. No only are children's interest gained but it can be maintained over a sustained period of time allowing for the better comprehension of arithmetic concepts.

The use of the deck of arithmetic flash cards does not have to be confined to the classroom or homeschooling setting. These fun cards can also be included as games for the beach, when out camping, and on vacations and sleep-overs.
