Julie Edwards was invited to the Super Bowl to present her Color and Soul Mineral Cosmetics to the NFL Wives Association on Thursday, Feb 4. Be on the lookout for the new www.colorandsoultv.com coming soon to your computer screen with interactive internet TV

programming that will bless and build lives.

Her breakthrough makeup line has changed the way women of color feel about their makeup and skin forever.

Launched in 2007, Color and Soul is the first ever mineral makeup formulated specifically for women with richly-pigmented skin. The light-feeling makeup soothes dry skin and can help heal acne and other skin conditions. It offers great coverage on all skin types, even for those with rosacea, acne, and vitiligo. Color and Soul is perfect for sensitive skin, and can even be worn to bed without any worry of clogging pores. It's made entirely of crushed minerals, and is all natural.

Some foundations tend to look "ashy" on highly-pigmented skin, due to pink tones commonly used in other products. Women of color can have up to 38 skin-tone color variations, and need a more diverse selection. The difference in Color and Soul is that it uses a gold/yellow base and other pigments to create a wide selection of shades. Colors are all custom-blended, and there are even shades available for Caucasian skin.

In addition to the large shade selection, this mineral makeup has a high natural SPF. Micronized zinc and titanium dioxide block the sun's rays which can cause skin damage and aging. This protection will also help in the healing process of acne scars, dark spots, and discoloration.

Color and Soul mineral makeup is lasts all day without fading, and feels like you are wearing nothing. It can be used as a foundation, concealer, and sunscreen all in one. A full size jar lasts up to six months, without the need for preservatives. Loose minerals may last for up to one year.

Mineral makeup is recommended by dermatologists and surgeons to speed up healing time after surgery of treatments. It allows skin to breathe, and goes on smoothly without caking. The sheer foundation can be mixed with moisturizer for a glowy look, or applied directly with a brush to create a perfectly flawless canvas. Levels of coverage can be adjusted by applying the makeup in layers.

Color and Soul also offers mineral eyeshadow, eyeliner, brow tint, blush, bronzer, and lip color to complement your look. Many services are available at the Color and Soul Cosmetic Café and Skin Care center in Camp Springs, MD. Makeup applications, consultations, personal or group lessons, facial treatments, and waxing are offered. Mineral makeup is custom blended to perfectly match your skin tone. You can find out more about these products, order online, and see before and after photos at www.colorandsoul.com.
