In his book *The Success Principles*, Jack Canfield presents his compilation of knowledge about how to actually get where you want to go in life. Essentially a road map for life success, Jack's skills at life coaching and this book combine to give students the ability to formulate their own personal guide to successful living.

Knowing what one's dreams and passions are become step one on the map. Achieving those dreams and living life to its fullest are the destination on the map. The principles of success are like the gasoline that drives the engine to its destination.

Jack Canfield puts over 30 years of life experience and learning into this volume. He has been mentored by great philosophers such as W. Clement Stone, and has followed the teachings of *Think and Grow Rich* author Napoleon Hill. With co-author Janet Switzer, he explains a step-by-step formula to achieve success for anyone who puts their mind to work, activating the power of their sub-conscious mind.

Learn the 64 specific principles to follow that have been used by successful achievers throughout history. These are fundamentals that apply to all circumstances and can be used in all professions. No matter what dreams a person may desire, the principles for success and strategies for achieving success are the same.

After studying the 64 principles, the student progresses on to create their personalization of the principles as they apply to their own situation. They are taught how to assemble their own dream team of positive thinkers and supporters. An important part of life success is financial success and money management. Knowing how to properly handle income and how to disburse it can be the difference between security and poverty, success and failure.

The book contains powerful stories of successful people, from CEO's to world-class athletes, celebrities and ordinary everyday people. It teaches the reader how to achieve the outcome they want from any event merely by changing their reaction to the event. Learn how to find those all important positive mentors and friends who can be encouraging to your efforts.

Old history can haunt and loom over future activities. In this book, the student learns how to deal with the past and put it behind, allowing the future to blossom unfettered by history. With a clear focus, the student is ready to answer when opportunity knocks at their door. Time management and the ability to say "no" are important skills that can be learned by studying *The Success Principles*.

Being a successful person goes hand in hand with feelings of success. Jack Canfield's book teaches great life coaching lessons, such as how to get what you want from people, and how to find those people. The book lives up to its subtitle, *How to Get From Where You Are to Where You Want to Be!*
