The Health 2.0 fall exposition and seminar will be the place to see the latest and greatest in tech for the health care professional, hospitals, and new technology developers looking for opportunity and investors.

As always plenty of media and the best promo will highlight Health 2.0 as physicians, medical professionals, insurance providers, and medical equipment manufacturers have prepared their very best to prepare the medical establishment in the United States for dealing with the implementation of Obamacare, make the latest in personalized medical decision making software and equipment available for practitioners, and gauge the pulse of what the medical community both needs and wants to maintain rigorous compliance with ever changing state and federally mandated reporting and advanced standards of care.

Health 2.0 is a not to be missed two day affair designed for every doctor in all fields of specialization, nurse, hospital administrator, nurse practitioners, medical equipment designers and marketers, and medical industry investors.

The hospital, doctor, nurse, and administrator that must be in the know simply cannot afford to miss the Health 2.0 conference.

The Sunday, October 7, afternoon agenda will deal directly with the latest software, gadgets, and patient monitoring programs and equipment.

Any practitioner that plans to be competitive and compliant must be in the know about the latest developments in patient monitoring, interfacing patient monitoring equipment to portable devices, and secure patient data transmission and sharing.

The latest new developments as well as the brightest platforms for the future will be advanced and discussed at the afternoon session of Health 2.0.

Health 2.0 is where you can solidify your plans for your next move to a more proactive patient oriented communication system that first keeps you in contact with every event in each of your patient’s treatment regimen and second makes the billions of dollars of federal money that is available for upgrading your practice just a phone call away.

Learn what you need to provide instantaneous care to every one of you patients though networking with other professionals in every specialty available in ways that are the fastest and most versatile available today and adaptable to the ever changing health care climate of the future.

New technology that puts you in control and provides the best care anywhere is what you want and that is what Health 2.0 has planned to give you the opportunity to see and experience firsthand.

Faster, more competent, leaner, and more accurate diagnostics, patient scheduling, and prescribing can be your next move toward a more patient focused practice with the latest developments from the best medical management systems in the word at Health 2.0.
Patient centered care is the growing buzz in medicine driven in part by government but driven by doctor’s patient and persistent lobbying for patient oriented care with a government that has finally seen the light based on the spectacular results this change produces in costs for the patient, the provider, and insurance providers.

Health 2.0 is the place where every person involved in any area of the medical profession can get a look at what the growing trends in patient care are.

The opportunity to better serve your patients comes first. The chance to get in on the ground floor of an investment opportunity that could make you literally millions is just an added bonus and incentive for you to be sure to attend Health 2.0.
