

GARRETT BOLKS JOINS VIRATECH ADVISORY COMMITTEE

(SE) Chris Ryan November 27, 2012

Viratech Corp. has created an open source biotech research and development platform, Viratech has created a unique platform leveraging the utility of social collaboration, which will allow cancer research the opportunity for the first time to become open sourced.

STOCKTON, CALIFORNIA/November 27, 2012 /Newswire/ -- Viratech Corp. (OTC: [VIRA](#)), the first open source biotech research social network platform, announced today that Mr.

Garrett Bolks has joined its Advisory Committee for Business Development.

Mr. Bolks graduated from the University of Tennessee in 1980 with a Bachelor of Science degree and a major in marketing. Garrett began his professional career in the medical industry at American Hospital Supply, where he worked for 18 years with the primary focus on the "OR" (Operating Room). He was recruited by SRI/Surgical Express in 1998 and went on to be the founder and President and CEO of All-Med Industries which focused on patient safety in the operating room.

His vision for the new towel, named the "D-Tec" towel was a big success. This concept has now become the standard of care in the industry. Garrett was also the co-founder of the William Garrett Company with the primary emphasis on providing protective apparel and N95 masks to Taiwan and China during SARS. During this time he also developed a line of exam gloves called "SureCare" and captured all of the HealthTrust Purchasing Group along with numerous other hospital groups.

In 2003, Mr. Bolks was appointed a member of the Association of Perioperative Registered Nurses (AORN) Patient Safety Task Force. He continued his pursuit of safety related items for the operating room, and became the President of Medical D-Tect-Or in 2005. Medical D-Tect-OR has created a "retained foreign object detection system" that utilizes a wand in the operating room to locate lap sponges, gauze sponges, operating room towels and surgical instruments following surgical procedures. Garrett has an extensive and successful medical background in the development, distribution and marketing of numerous innovative products in a variety of disciplines.

Mr. Bolks is also an Eagle Scout and current Assistant Scout Master for Troop 10 in Tulsa, Ok. He is very active with his church working in both the children's ministry as well as an alter counselor. He is married to Roxanne and they have two children, Ryan 14 and Brie 12.

Bolks states, "I am dedicated to help bring change and improvements to the medical industry, I have had a lot of medical and business experiences that I can offer. It is my vision to help Viratech bring solutions for health and advancing medical care technologies to those that need it most." Garrett brings not only talent to the Viratech Advisory Committee, he has had a lot of international medical business experience and contacts to help the Company's business development platform.

About Viratech Corp.

Based in Stockton, California, Viratech Corp. has created an open source biotech research and development platform, Viratech has created a unique platform leveraging the utility of social collaboration, which will allow cancer research the opportunity for the first time to become open sourced. This is accomplished by allowing our development partners the ability to protect, promote and produce their research in unified online collaboration hubs known as micro social networks. Viratech's open source platform has integrated several intellectual property tools which, by leveraging our social collaboration network, can give our development partners a new intellectual property mechanism, which will help in addressing the protection of Intellectual Property, promotion through collaboration in our protected open source platform, and commercial development of the products achieved through collaborative

research.

Using this platform, Viratech members can protect their intellectual property, then use Viratech's micro social network as a utility to promote and crowdfund the research and development to produce the new technology.

Forward-Looking Statements:

This press release includes forward-looking statements concerning the future performance of our business, its operations and its financial performance and condition, and also includes selected operating results presented without the context of accompanying financial results. These forward-looking statements include, among others, statements with respect to our objectives and strategies to achieve those objectives, as well as statements with respect to our beliefs, plans, expectations, anticipations, estimates or intentions. These forward-looking statements are based on our current expectations. We caution that all forward-looking information is inherently uncertain and actual results may differ materially from the assumptions, estimates or expectations reflected or contained in the forward-looking information, and that actual future performance will be affected by a number of factors, including economic conditions, technological change, regulatory change and competitive factors, many of which are beyond our control. Therefore, future events and results may vary significantly from what we currently foresee. We are under no obligation (and we expressly disclaim any such obligation) to update or alter the forward-looking statements whether as a result of new information, future events or otherwise.
