Acupuncture Clinic In Calgary Combines Traditional Chinese Medicine With Hypnosis

Stephen Iervella December 30, 2012

Dr. Paul Tse of the Peking Herbs and Acupuncture Centre Combines Traditional Chinese Medicine With Hypnosis To Produce Amazing Results In Calgary

FOR IMMEDIATE RELEASE (Newswire.net – December 30, 2012) Dr. Paul Tse is Calgary’s most experienced Doctor of Traditional Chinese Medicine (T.C.M) It is one of the oldest forms of medicine in the world. Originated in China over 5000 years ago, T.C.M is getting recognized around the world today as an effective method in preventing and treating diseases.

"T.C.M involves observing the physical appearance to assess the health condition of a person. Most diseases can be detected long before clinical symptoms appear. For example, dark under eye circles indicate a weak chi and blood circulation of the kidney and liver meridians. If left untreated this condition may in time result in back pain, low sex drive, impotence, tinnitus (ringing noise in ears), degeneration of hip, knees, bones, joints and vertebrae discs, menopausal problems, chronic fatigue syndrome, hearing loss, vision deterioration, allergies, cancer or many other chronic diseases due to these two meridians that are related to the back, eyes, ears, sex organs, bone, tendon, hormones, vitality, immune system etc. By treating the blood and chi appropriately, T.C.M. can prevent or even reverse diseases because we, as T.C.M. doctors, recognize the importance of the chi and blood; if they are weak, blocked or affected by pathological factors, diseases can arise.

Take headaches for example. From the patient's pain we are able to find out the origin of the problem. Pain at the forehead, temples, top and back of the head may indicate the chi at the following meridians are blocked: large intestine and stomach, gall bladder, liver, urinary bladder respectively. Pain is not the only indication of disease, the tongue, voice, body odor and pulse may reveal internal problems."

"I have discovered that Acupuncture combine with Hypnosis or Mind Body Therapy, is very effective in dealing with compulsive behaviours, eating disorders, weight problems, emotional problems (anxiety, grief, depression, phobias, stress, resentment, nervousness, low self-esteem, excessive worrying and anger, etc) and many more dis-ease's"

Here's just a few of the testimonials from patients of the peking herbs and acupuncture center:

"I was sitting at his doorstep feeling like I wanted to commit suicide – I was so depressed. After one treatment I felt like a more sane normal human being and the day was looking so much brighter – it only took about 15 minutes. The best part is I feel calm."

- Sharon Stone*, Acting Consultant

"I Am So Excited About The Remarkable Improvements In My Health

I have only been coming less than 2 months and my fatigue is greatly lessened and I feel better physically than I have in over 15 years. With continued treatments I expect a full recovery. I am so excited about the remarkable improvements in my health."

- Laurie Wordie*, Housewife, Calgary
