

Orlando Roofer Advanced Roofing Solutions Announces Maintenance Plans

Mark Rodwell September 19, 2014

[Roofing Contractors In Orlando](#)

Due to increased demands in storm damage roof repair, Orlando roofing contractor, Advanced Roofing Solutions, Inc. intends to better serve local homeowners by offering roof maintenance plans to help reduce the costs of home repairs.

([Newswire.net](#) – September 19, 2014) Orlando, FL -- With the addition of these maintenance plans to their growing roof leak repair services in Orlando, those residing in Central Florida that participate in this new service will not have to come out of pocket with more money to get their roof fixed. Some benefits include quarterly or annual roof inspections, repairing roof leaks and a generous \$1500 credit

towards a complete roof replacement. In addition, these service plans will be transferable to the next owner. The company also intends to offer flexible payment options either monthly or on an annual basis.

Brandon Losik, owner and president of Advanced Roofing Solutions of Orlando, stated that living in Central Florida means dealing with a lot of storms, hurricanes and sometimes hail. The chances of your roof being damaged after a significant storm are high and the demand on local roofers and roof repair specialists in Orlando increases. This makes it difficult to get the work done and as the demand for materials go up, so do the costs. Having a maintenance plan in place and scheduling quarterly or annual roof inspections will help reduce the costs of major repairs.

Storms and high winds also mean more frequent damage and roof leaks that can end up costing more to fix than expected. This leads to customers having to spend more out of pocket than they can often afford. For Central Florida homeowners, these maintenance plans from ARS are designed to help offset and reduce the frequent costs for repairing the roof after destructive storms. Once the service plans are in place, many customers can begin to see the benefits immediately. Losik commented, "Instead of being charged a couple thousand dollars, in most cases, the repair costs will be covered under the maintenance agreement."

As an established Orlando roofing company serving the local area for several years, [ARS](#) offers a variety of services and products in addition to their new maintenance plans such as asphalt shingles installation, standing seam metal roofing and commercial roofing services including TPO, Built-up, EPDM and torch down flat roofs. In addition, they install an array of tile roofing products including solar tile, light weight synthetic, terra cotta, barrel tile and Spanish clay.

Some recent clients of [Advanced Roofing Solutions](#) were amazed and happy with the roof replacement service they received. Claiming the roofers were professional and clean throughout the entire job. They were impressed with the wheeled magnet that collected all of the extra screws and nails in the yard. Stating the communication and follow up between the company and the client was good and a representative showed up after the work was complete to ensure the clients were happy with the overall job.

With the implementation of these new service options, the company expects homeowners will be able to save on

repair expenses while allowing the company to serve their customers more efficiently.
