

In Dallas, Texas, Holistic Weight Loss Program Released

Stanley Lang May 03, 2013

Holistic Weight Loss Dallas

The weight loss industry is a multi-billion dollar behemoth, and it works in part because so many people try, fail, and then try again. Dr. Stanley Lang, MD, who runs a holistic medical practice reaching out to Dallas, says that most people will fail because most programs only ever treat the body, and fail to treat the real causes of obesity, particularly chronic stress.

(Newswire.net -- May 3, 2013) Dallas, TX -- Bikini season is approaching, and while many New Year's Resolutions have fallen by the wayside, millions, undaunted by failure in the past, are gearing up for another round of diets and exercise, in the hopes of finally shedding the weight that plagues them. One doctor, however, is skeptical, and he's reaching out to various communities, including right here in Dallas, TX.

Dr. Stanley Lang, MD, is a medical practitioner with 30 years of experience, and he's seen the whole spectrum of weight loss tactics. "The problem most people have is keeping the weight off long term. Anyone can lose weight 100 different ways, but more than 90% who lose weight just regain it again, because each 'new' system or diet that comes out usually only pays attention to the body."

"Our society is stressed out, and with chronic stress, most people simply cannot sustain long-term weight loss, and many never even reach their goals. A truly holistic approach deals with the body, but also with the mind and the spirit to solve all health issues, especially the devastating effects of chronic stress," says Dr. Lang, who has developed what some believe may be the first truly [holistic weight loss system](#), which he offers at [PERMANENT-WEIGHT-LOSS-NOW.COM](#). "Until now, insofar as I am aware, such an approach has simply not been available in the marketplace."

Dr. Lang states that many of his own patients have seen sustained weight loss through following his holistically-based guidelines. "I knew there was an obvious need for an holistic weight loss program, and so I decided to answer this need and provide people with a better chance at long term success."

"Most diets simply aren't geared for permanent weight loss," explains Dr. Lang, "because they aren't healthy for the long-run." Even many diets that purport to be "lifestyle changes" and claim to not be "diets" in the traditional sense fail, says Dr. Lang, because they all wind up only treating the body.

Dr. Lang's weight loss system has recently been cleared to be offered in the Dallas, TX area.
