

# Von Schrader's Announces Air Cell Extraction Carpet Cleaning System in Quebec

Marc Lemonnier May 07, 2013

Before and after cleaning

**Totalnet / Éconet, carpet cleaning is proud to announce the famous Von Schrader's air cell extraction carpet cleaning system in Quebec.**

**(Newswire.net -- 7 mai 2013) Montréal, Québec --** Totalnet entretien / Nettoyage Éconet announces that it is the only carpet cleaning company authorized to provide this unique and patented carpet and upholstery cleaning system in Québec

Air cell extraction is the only system that cleans all the way down to the base of your carpet and upholstery and extracts all of the soil in just one pass. In fact, it's so unique that it's patented.

Air Cell Extraction™ technology uses thousands of tiny Air Cells which are 90% air and only 10% moisture, which prevents over wetting. Air Cell technology dramatically lowers moisture which eliminates problems associated with wet cleaning.

The 2 major feature this carpet and upholstery cleaning system offer, is that your carpet and furniture Dries quickly – often in less than one hour. No over wetting or bad odors. No shrinking, warping or mold

The air cell extraction process uses bubbles for moisture control– not gallons of hot water – to get your carpet and upholstery completely clean. Their products are also green and aircraft approved. It's the perfect encapsulation system and also safer for people, pets and the environment.

Our carpet and upholstery cleaning processes use gentle, biodegradable surfactants, non-toxic, and fragrance-free detergents that leave no sticky or oily residues to attract and hold soil.

The Von Schrader system applies dirt emulsifying cleaning bubbles, brushes it all way down to the base of the carpet fiber using cylindrical brushes (unlike rotary brushes which merely clean the surface), and then floats the dirty bubbles before they can sink back down into the carpet or fiber. This simultaneous operation combined with air cell bubbles ensures that there's no danger of shrinkage, dry-rot, browning or mold Plus, the carpet is dry often in less than just one hour because we control the moisture.
