(Newswire.net -- May, 22, 2013) Scottsdale, AZ -- Need a little help achieving that youthful glow just in time for summer? Carlotti Cosmetic Surgery Center in Scottsdale, AZ can help. Their team of experts has the knowledge and experience to help keep their patients looking and feeling their best. Through May 31, Carlotti Cosmetic Surgery Center is giving patients 10% off their BOTOX treatments or 20% off both BOTOX® and Juvederm® injections. Looking good was never so easy.

Whether a patient is looking to avoid surgical procedures altogether or needs to maintain their prior surgical results, Carlotti offers a variety of BOTOX and [Juvederm treatments](#) for every need. It is important to note the differences in these treatments so patients choose the best option for their skincare needs.

BOTOX is a treatment designed to soften the dynamic lines that occur during facial movements such as smiling, as well as treat the static lines that are present at rest due to the natural aging process. Very low doses of BOTOX are given through a series of tiny injections that soften and relax the movement of fine facial muscles, helping to dramatically reduce the appearance of wrinkles. Results can be seen in as little as a few days and can last for up to four months. BOTOX has been used for over 75 years to treat a multitude of medical conditions. Dr. Albert Carlotti and Dr. Michelle Carlotti are considered to be two of the top doctors in the Valley with BOTOX treatment experience, having treated thousands of patients.

Sometimes the skin needs additional help to decrease the effects of the aging process. Juvederm is an injectable filler that can add volume to the skin. As our skin ages, collagen and elastin decrease, increasing the appearance of wrinkles. Smoking, poor diet and too much sun exposure can also contribute to the aging process, leading to an increase in wrinkles. The use of Juvederm is an excellent non-surgical option to help improve the appearance of the lines in the skin, especially those around the mouth and nose. Results vary from each individual.

Carlotti Cosmetic Surgery Center is a leading Cosmetic, Reconstructive and Maxillofacial Surgery provider. Led by the husband and wife team of Drs. Albert Carlotti and Michelle Cabret-Carlotti, the Center is dedicated to exceptional results and the highest level of patient care. The Center offers an array of treatments including facelifts, rhinoplasty, breast augmentation and liposculpture. Dually accredited physicians, the Drs. Carlotti also provide Jaw and Maxillofacial Surgery procedures including jaw (orthognathic) surgery, cleft lip and palate repair, sleep apnea surgery and the placement of [dental implants](#).
