Termites

## MTB Pest Control prepares for another busy pest season

(Newswire.net -- May 29 2013) Washington D.C. -- Homes are amongst the biggest investments that any person can ever have, and it is only fitting that homeowners take care of their properties. Houses go through the normal wear and tear process, which is

why home renovation is a normal expense for homeowners. Apart from regular wear and tear, pests can also ruin a beautiful home.

Unwanted pests should be dealt with immediately. This is a problem that should never be ignored. MTB Pest Control provides quick solutions to homeowners who have pest problems as well as those who suspect that there are unwanted pests in their homes.

MTB Pest Control is a family-owned business that provides fast solutions and is serious about helping clients take care of their homes. The company offers its services for a reasonable cost, ensuring that homeowners will not hurt their wallets.

The company has extensive experience in providing [pest control in Maryland](#). Its owners, Milton Brown Jr. and Milton Brown III, have over 5 decades of experience. They have already served numerous homes and commercial establishments.

The company is licensed and insured in Virginia, DC, and Maryland. It is one of the most popular pest control companies known for its expertise in dealing with termites MD. It can help anyone who has concerns with ants in Maryland and all sorts of pests from mice, cockroaches, bedbugs, bees, and snakes.

MTB Pest Control uses only chemicals that are approved by the EPA. This means that chemicals are safe for both people and pets. The company is proud of its customer service and ensures that all customers will be satisfied with the service they will receive.

Pests can be dangerous to any home, especially to those that are made of wood. Termites have their own way of coming out of the ground and creating tubes. MTB Pest Control is proud to say that termites are no match to them.

The company also has programs to deal with the toughest [pest problems in DC](#), Maryland, and Virginia. Its Integrated Pest Management program consists of special programs that protect homes from pest infestation. It includes making a home mouse-proof. Mouse-proofing a house means closing all the holes found all over the house.

The program also includes a 3-step bed bug service. Service is performed 3 times, and it done every 10 to 14 days. The program is very effective in getting rid of bed bugs. Clients only have to pay once for this 3-step service.

Another program is the termite inspection service where termites are dug down in the ground where they live. The treatments come with a 5-year warranty. As for cockroaches, MTB makes use of several products to get the job done.

MTB Pest Control provides monthly and bi-monthly services for general pest control. The company gives a fair price to everyone including corporate clients. Services are personalized and work is done only when the homeowner is around. The company provides free consultations as well as free quotes. There are a lot of special offers available that guarantee clients of significant savings.
