

Biotin For Hair Growth and Shine Continues To Trend In Beauty Industry

Brandon Schoen July 19, 2013

Customers dub Elite Gold Solutions' professional-grade formula of biotin, new to their product line on Amazon, as a "miracle hair pill". No surprise as biotin leads the beauty industry as one of the safest and most effective way to promote hair health.

(Newswire.net -- July 19, 2013) Miami, FL -- In a video posted earlier this year on Huffington Post, popular beauty expert BellaSugar discussed the top tricks for growing beautiful long hair quickly and naturally. Among the advice was her recommendation for taking **Biotin for hair growth**. A supplement that has been

considered a "miracle hair pill" for decades, biotin is still the industry leader in the beauty world, believed to be the safest and most effective way to boost the health of hair. New companies, such as Elite Gold Solutions, are taking this age-old secret and reformulating it for higher potency to help women achieve better results more quickly.

While thorough medical studies haven't been done on the effectiveness of **Biotin on hair growth** since the early 90's, the anecdotal evidence has crossed generations and continues to help the all-natural supplement fly off the shelves on a regular basis. And while scientists will not accept women's personal stories as evidence of Biotin working, it is hard to ignore the thousands of women with beautiful hair who swear by it.

Take for example the pack of supermodels backstage after a Paris fashion show last year. In the interviews they were conducting, when asked how they would relax, unwind, and recover from the rigors of cat-walking (which includes their hair being teased, bleached, pulled, and sprayed several times a day), several of them replied that part of their post-show regimen includes increasing dosage of their daily biotin supplements to help heal and treat their damaged hair.

Elite Gold Solutions, who has just added a professional-grade formula of biotin to their Amazon product line, says that biotin continues to be popular mainly through word of mouth, which, as any marketer knows, is one of the most powerful tools to attract and keep customers.

A spokesperson for Elite Gold Solutions says that **biotin** will remain popular, whether the research catches up or not, because customers care about results period.

And while direct links between biotin and hair growth have not been studied, the medical field has known for years that biotin, which is naturally found in various food sources, plays a role in the health of hair, skin, and nails. Furthermore, the same researchers will not hesitate to say that people who suffer from a biotin deficiency have noticeably thinner hair, brittle nails, and patchy skin.

And with sales showing no sign of slowing, **biotin** looks as if it will continue being one of the most popular natural supplements for women across the globe wanting to improve appearance and, ultimately, confidence.

Biotin 5000mcg for hair, skin, and nails by Elite Gold Solutions is being offered exclusively on [Amazon.com](https://www.amazon.com).
