STOCKTON, CALIFORNIA/ September 9, 2013 / Newswire/ -- Viratech Corp. (OTC: VIRA), the first open source biotech research social network platform, recognizes today the many contributions of Barkat Charania MD, who sits on Viratech's Advisory Board.

Dr. Kevin Buckman, the CEO, of Viratech stated, "He brings a wealth of medical knowledge and experience to Viratech. He has extensive international medical experience and has done extensive voluntary work with many organizations like the Aga Khan Development Network (AKDN), and other organizations. He has become an expert on health and nutrition. Dr. Charania practiced medicine and surgery for over 30 years and managed a private hospital of 200 beds for 15 years."

Dr. Buckman added, "Dr. Charania has extensive international medicine experience, and his assistance to Viratech to help launch a global initiative in health is being recognized in honor of his birthday today. In addition, his research and contributions in the field of preventative health are helping to improve health care and Viratech's initiative for health."

Dr. Charania has served as a consultant to WHO, UNICEF and International Council for Control of IDD. He managed eradication of IDD project from 1979-90, a collaborative effort of UNICEF, AKDN and NIH. He served on faculty of Aga Khan University, taught at Postgraduate College of Physicians and Surgeons, and was invited to be guest lecturer at Institute of Business Administration and as Keynote speaker at National Iodine Deficiency Disorders (IDD) seminars.

Dr. Barkat Charania is acutely inquisitive about the meaning of our existence on the earth. He writes about Health Solutions, Logic, Philosophy and Sufism. He started a blog to discuss his learning from experience and history that is posted on his web site: [DrCharania.org](http://DrCharania.org).

Most of his writing is based on simple logic and common sense. After practicing allopathic medicine for over three decades, he is an advocate of preventative medicine. He believes the effects of diseases can be limited by eating right foods; He quotes Hippocrates 400 B.C "Let food be thy medicine and medicine be thy food."

His management skills and vast medical practice experience can help with the Viratech goals of improved medical care, open source research, and expand social network capabilities. His vast international medical and humanitarian experiences can help with Viratech's goal to be an international company.

His many contributions to Viratech and health care are being recognized today as important contributions to Viratech's Social Network, Open Source Research, and the Company's Plan to improve health care for cancer patients, those with diabetes, and other chronic diseases.

## **About Viratech Corp.**

Viratech Corp. has created the first open source biotech research social network platform. The purpose of the platform is to make it possible for individuals or smaller companies to compete with larger companies in the race to patent new medicines or technology. This has been made possible by leveraging social collaboration in a way that allows new biotech ventures the ability to protect their intellectual property, then simultaneously allowing those same ventures the ability to promote and crowdsource their development.

## **Forward-Looking Statements:**

This press release includes forward-looking statements concerning the future performance of our business, its operations and its financial performance and condition, and also includes selected operating results presented without the context of accompanying financial results. These forward-looking statements include, among others, statements with respect to our objectives and strategies to achieve those objectives, as well as statements with respect to our beliefs, plans, expectations, anticipations, estimates or intentions. These forward-looking statements are based on our current expectations. We caution that all forward-looking information is inherently uncertain and actual results may differ materially from the assumptions, estimates or expectations reflected or contained in the forward-looking information, and that actual future performance will be affected by a number of factors, including economic conditions, technological change, regulatory change and competitive factors, many of which are beyond our control. Therefore, future events and results may vary significantly from what we currently foresee. We are under no obligation (and we expressly disclaim any such obligation) to update or alter the forward-looking statements whether as a result of new information, future events or otherwise.
