Decorative wall panels offer a way for homeowners to easily customise the look of any privacy fence cost-effectively.

(Newswire.net -- September 16, 2013) Sydney, NSW - [Decorative wall panels](#) offer a way for homeowners to easily customise the look of any privacy fence cost-effectively.

Wallmark's range of do it yourself fencing kits makes the entire process easier and more affordable.

Building a masonry fence around the yard of any home can be the ideal way to create some privacy for the family. When such type of wall is erected with a decorative finish, it can definitely enhance the visual appeal of the place. Unfortunately, the cost of building a masonry wall can be quite prohibitive. At the same time, there is also the issue of installing footings below the fence to ensure stability and strength.

By comparison, using Wallmark's innovative wall panels allows homeowners to create highly decorative fences with minimal cost or fuss that can still give the same look as [feature brick walls](#).

Wallmark's fence panels are created using a clever modular design. This allows the panels to be slotted into the posts easily, creating a seam-free finish. Panels can be customised in a range of different finishes, so it is possible to make them seem just like a rendered brick wall. It is also possible to paint the finishes in any colour preferred.

There is also no need to install strip footings beneath these types of wall panels. This makes it much easier for a homeowner to create a privacy fence directly from a simple DIY kit.

Wallmark's team specialise in panel fencing, designed to suit personal residential use up to more heavy duty commercial and industrial requirements. They also offer DIY fencing kits at highly cost-effective prices and its delivery to any location right across the country.
