Study Proven Non-Surgical Treatment for Peripheral Neuropathy Pain

Bruce Parker  February 10, 2014

Vitality Health Center, a neuropathy treatment center in Denver, Colorado owned and managed by Dr. Josh Johnston has opened a new medical intervention on managing the painful symptoms of peripheral neuropathy.

(Newswire.net -- February 9, 2014) Temecula, CA. -- The treatment plan is multifaceted, follows systematic medical diagnosis and does not involve expensive surgery or medicine. Dr. Josh Johnston, also added that it is a permanent solution to the pain that patients can take advantage of.

This neuropathy treatment center in Denver offers two components of the said non-surgical treatment for peripheral neuropathy pain: Angiogenesis and Monochromatic Infrared Energy.

According to Dr. Josh Johnston, these two components of treatments are study proven. To add also, a patient suffering from neuropathic pain can greatly benefit from these treatments. He or she can be completely free from the pain.

The angiogenesis is a natural physiological process in which a new blood vessel will form from pre-existing vessels. This natural phenomena, a normal and vital process occurring in wound healing. And in the case of peripheral neuropathy, it helps our bodies revert back to normal state, preventing amputation, vision loss and overall improvement of our health.

On the other hand, monochromatic infrared energy is utilized to increase blood circulation and reducing the pain. Pulsed Electromagnetic Field Therapy is commonly introduced and used in orthopedic treatment and address issue to perception of pain. Patient undergoing in this treatment will benefit not only physiologically but as well psychological and neurological healing.

For patients suffering with peripheral neuropathy, the Denver Vitality Health Center can provide them the needed medical treatment and necessary intervention.

As Dr. Johnston also stated, “based on the research I decided to incorporate this new therapy and witnessed many patients exhibit almost immediate pain relief, even while still being educated on this new breakthrough treatment program. Because of the results I witnessed, I felt it was my obligation to offer this new breakthrough treatment in my office at the Neuropathy Denver no matter what the cost.”
