

Kitchen-Classics Introduces a New Line of Built-in Foaming Soap Dispensers

Michael Weir June 08, 2014

Kitchen-Classics, makers of various kitchen products, announces the release of its new line of built-in foaming hand soap dispensers sold exclusively on Amazon and www.sinksoapdispenser.com. The soap dispensers will be available for purchase in July, 2014.

(Newswire.net -- June 8, 2014) Coeur d'Alene, ID --

Kitchen-Classics announces the release date of its latest product, built-in foaming hand soap dispensers - available for purchase mid-July, 2014.

Kitchen-Classics, announced the addition of foaming hand soap dispensers to its line built-in sink soap dispensers. The polished stainless steel dispensers, which are designed for in-counter installation, will be exclusively sold on Amazon and www.sinksoapdispenser.com.

The management team at Kitchen-Classics announced its decision to use Amazon as a principle distributor due to the efficiency of Amazon's distribution, as well as the growing popularity of Amazon's Prime account which offers Amazon customers free two-day shipping. At the same, Kitchen-Classics will be offering these new foaming hand soap dispensers at its new website: <http://sinksoapdispenser.com>. By offering its customers the opportunity to purchase soap dispensers at its new website, Kitchen-Classics will be able to reach many customers who do not shop on Amazon as well as offer special pricing and bundles of their new 100% Organic Foaming Hand Soap.

The new foaming hand soap dispensers will be made of 304 Stainless Steel and rigid plastic. The company will offer two finishes for the hand pump assembly, polished and satin.

Kitchen-Classics' introduction of these unique sink soap dispensers reflects the company's answer to a long period of market research and the surveys of many of its current customers. Foaming hand soap dispensers, long in use in America and across the globe, are typically packaged in disposable plastic bottles. Tens of thousands of these empty plastic bottles are dumped into our nation's landfill each week.

Suzanne Weir, Co-Founder of Kitchen-Classics, said, "By offering a built-in foaming soap dispenser, we feel confident that eco-minded consumers will be happy to have the option to replace the plastic unit for a permanently installed sink soap dispenser. Our family has used foaming hand soap for years. It just made sense that we would be the company that would bring to market the first built-in solution to all the plastic containers that are clogging up our landfills.

Weir also announced today that this new addition to their product line will include packaging with links to their new company website that will host installation videos for their customers. The company will print QR Codes on their installation guide, which will allow their customers to view the installation videos on their smart phones or other mobile devices (iPads and other tablets) at the site of installation.

Kitchen-Classics' new line of liquid soap dispensers will be available for purchase in mid-July, 2014 exclusively on Amazon and <http://sinksoapdispenser.com>.
