*ec² Software Solutions Attending Annual Congress of the European Association of Nuclear Medicine in Gothenburg, Sweden.*

(Newswire.net -- October 8, 2014) Somerset, NJ – ec² Software Solutions will be exhibiting at the upcoming European Association of Nuclear Medicine Annual Meeting this October. Held October 18-22 in Gothenburg, Sweden, the EANM Annual Meeting has developed an exciting program for attendees with scientific sessions, multi-disciplinary symposium, and an exhibitor hall. This year, the event will offer different ‘tracks’ for attendees to focus and choose their specialty interest. There will be biology, oncology, radiopharmaceuticals, and more. In these educational sessions, attendees can earn valuable continue medical education credits. There are many networking events and an exhibit hall packed with the latest technology.

ec² Software Solutions will be launching our newest product NMIS version 15 and our updated BioDose software. NMIS Software was originally developed in 1985 as an informational system for Nuclear Medicine departments as a way to manage basic record keeping. Through its 29-year history, it has evolved and expanded into one of the most robust software systems. It is refined and tailored to meeting the changing needs of today’s Nuclear Medicine departments.

The annual EANM congress has become a forum for scientific exchange as well as for networking. It attracts over 4,200 participants. The congress is well established and recognized by colleagues and is seen by industry as the foremost marketplace for nuclear medicine products throughout Europe. For information on registration, please visit the EANM website or the EANM Facebook Page.

Representatives from our exclusive U.K. distributor, Bartec Technologies, will be spending time in our booth as well. If you are attending please stop by our booth #101. We look forward to seeing you at EANM’s meeting. If you cannot attend the event but would like additional information, setup a presentation or receive a proposal for the NMIS Software from ec² Software Solutions, please contact us at 1-800-851-0025, option 2.

**About ec² Software Solutions**

For nearly 30 years the needs of the Nuclear Medicine, Molecular Imaging, Nuclear Pharmacy and PET manufacturing fields have been at the core of our business driving us to develop new products and guiding our efforts to refine existing ones. We continue to offer industry-leading software products that help medical providers navigate the vast and complex regulations of the Nuclear Medicine industry. We design, implement and support comprehensive software solutions to simplify the daily operations of your facility, including production of radiopharmaceuticals, distribution and patient administration. In 2011 NMIS and BioDose came together to unify their presence in the marketplace and ec² Software Solutions was born. The acronym for ec² (or ecc) is to “educate, communicate and cooperate”. This represents our company mission statement. ec² Software Solutions is located in three states: New Jersey, Nevada and Arizona. These three locations serve the national and international community of nuclear industry professionals.
