

# 4 Important Factors To Look For When Buying A Brass Grill Brush

M Marketing October 16, 2014

Do-Be Brass Premium Brass Grill Brush

**Many consumers are unaware of the four important characteristics that are critical when buying a brass grill brush to ensure not only their safety but also the overall enjoyment of grilling.**

([Newswire.net](http://Newswire.net) -- November 14, 2014) Falmouth, ME -- There are four important characteristics that consumers should be aware of when choosing a barbecue grill brush. Do-Be Products, a top rated seller on Amazon.com, fits all of these characteristics.

Here are the four specific things consumers should look for when choosing a grill brush.

1 - Reviews from other buyers - Reviews are very important so that consumers can read and make an informed decision on purchasing based on the buying experience of others. Do-Be Products, a top rated seller on Amazon.com, has proven to be one of the top trusted sellers of brass grill brushes, and it is shown from the great reviews. Here is some of the feedback from the reviews on Amazon:

"I have worn out many grill brushes and the Do-Be Brass Premium Brass Grill Brush is by far the best one I have ever had. It is sturdily made. I love the long handle that enables one to clean the grill while it is still hot. The brass bristles clean thoroughly and will last longer than I will. An excellent purchase."

-Tischa Campbell on September 6, 2014

"Pretty solid product. I really like that it was longer than the others, so you are not getting your hands into the grill. The seller was fast and efficient."

-Don Juan "Tubby" on August 23, 2014

"It is quality made and we appreciate the long handle for those hard-to-get areas on the grill that need cleaning. Grilling is so much fun when you know the clean-up is so easy by using the grill brush!"

-Meo "Meo" on August 20, 2014

"It's very well-made, comfortable yet long enough to avoid your being burned or scraped. At the price I expected it to be flimsy but it's not. The brush is just right to clean... without doing harm."

-Gadget Guy on May 11, 2014

"We love the extra long black colored handle and the brush does a great job cleaning the grates without any scratching!"

-Sas on May 5, 2014

In addition to reviews, here are some other important factors to consider.

2 - The length of the brush - The optimal length is 21 inches - long enough to not burn your hands, but also a good length to give you leverage for cleaning.

3 - The quality of the bristles - The consumer needs to make sure the bristles are high quality and sturdy, you don't want the bristles falling off and ending up on the grill to later end up in your food.

4 - The type of bristles - Depending on the type of grill that you have, make sure you have the proper bristles, either brass or stainless steel

"When we brought our brass grill brush to the Amazon marketplace, we wanted to make sure that we didn't just bring any grill brush, but one that has all the great characteristics of a high quality, safe and user-friendly brush, and we are thrilled, the feedback has been great" says Don, a representative of Do-Be Products.
