

Invader Pest Exterminator Achieves Associate Certified Entomologist Status

Matthew O'Brien March 18, 2015

Fred Willey Associate Certified Entomologist

Fred Willey, owner of Invader Pest Management in Glendale, AZ, recently certified by the Entomological Society of America Certification Corporation as an Associate Certified Entomologist.

(Newswire.net -- March 18, 2015) Glendale, AZ -- Fred Willey of Invader Pest Management was recently certified as an Associate Entomologist by the Entomological Society of America Certification Corporation on Jan 27, 2015. To achieve Associate Certified

Entomologist (ACE) status, a pest-control operator must have a minimum of seven years of [verifiable pest management experience](#), the knowledge and ability to pass a rigorous test on insect pest control, a current U.S. pesticide applicators license, and a willingness to adhere to the ACE Code of Ethics.

"We're very proud of the work Fred did and the knowledge he gained in order to become certified ACEs," said Barbara Willey, Vice President of Invader Pest Management "It means a lot to have nationally-recognized, certified experts as part of the company."

The ACE examination includes questions about basic entomology; insect identification, life cycles, and control measures; health impacts of pests; ecological principles pertaining to pest control; environmental impacts related to pest control; [integrated pest management](#) (IPM); pesticide safety and health issues; pesticide technology and resources; organizations and associations of significance to the pest control industry; and laws and regulations affecting the industry.

Invader Pest Management is an [Arizona leader in the Pest Control Industry](#) since 1994.
