

# DIY Adds Affordable, Natural Insect Control to Its Catalog

Carl Staffel June 16, 2015

DIY Pest Control Power

**DIY Pest Control Power is now a leading provider of low-cost, natural insect traps, dusts, sprays, and more that are safe for people and the environment.**

([Newswire.net](http://Newswire.net) -- June 16, 2015) Houston, TEXAS --Insect control, safety, and affordability aren't often used in the same sentence, but DIY Pest Control Power has changed this with a new range of safe, low-cost, and natural solutions. The company has introduced several insect control products that don't pose a health or environmental risk. These include eco-friendly traps, dusts, sprays, and insect control kits. Effective, proven natural/botanical

formulas enable customers to eradicate crawling and flying insects in any indoor or outdoor location without an expensive exterminator.

Numerous products are now also available with free shipping, further saving the customer. Several natural products can now be purchased directly from DIY's e-commerce website. Naturally occurring compounds such as silica, peppermint, and a host of other botanical and natural ingredients have been added to boost these products' insect-killing properties. These effective items also come with DIY's 100% Price Guarantee and a 100% Satisfaction Guarantee.

DIY's naturally formulated insecticides, available online via its website, now include:

- **Lo Line Insect Monitor and Trap:** Pesticide free and non-toxic, this product is small enough to fit beneath kitchen appliances in any food prep area, school, or hospital. It uses a sticky glue to trap insects drawn to a food-based attractant. Roaches, bed bugs, spiders, and others cannot escape.
- **CimeXa Insecticide Dust Bottle:** The 4 oz. bottle features a safe, odorless silica dust that lasts up to 10 years in undisturbed areas. It is effective on pyrethroid-resistant bed bugs and clings to their exoskeleton, leading to dehydration and death. With 2 ounces used per 100 square feet, it is also effective on ants, cockroaches, spiders, mites, ticks, and termites. The product is also available in 5 lb pails.
- **Essentria General Household Spray:** The formula of rosemary oil and peppermint oil kills flying and crawling insects and is suitable in any home, commercial, or industrial setting. It is best applied in cracks, crevices, dark corners, and drains; on countertops; and in/around cabinets.
- **MotherEarth Granular Scatter Bait:** A broad-spectrum insect control product, the product contains boric acid mined directly from the Earth. It is safe for use around pets. The bait is suited for use in homes, businesses, restaurants, and schools.
- **Riptide:** The half gallon bottle has a water-based pyrethrin ULV effective for killing mosquitos and other flying bugs. This product is suited for mosquito misting systems and usable around landscape plants. It's also safe to use as a contact spray in food storage areas and around home foundations.

Calvin Thigpen of DIY Pest Control Power, said, "This time, we've gone beyond simply offering the customer an affordable solution. Our natural/botanical insecticides eliminate insects without posing a health risk to humans or pets, or leaking harmful compounds into the environment. All these items are in stock at our online store now."

These items and other insecticides/equipment can now be purchased directly from the company's online shopping cart. Benefits include fast shipping and hassle-free returns. DIY ships to anywhere in the USA from its Houston warehouse within 1-2 business days. In addition to free standard shipping, UPS Next Business Day, 2nd Business Day, and Ground shipping are available at an extra cost.

The company supplies natural insect killer dust, pesticide-free traps, repellents, baits, nematodes, and insect control kits. For more information on these and more, with free shipping, go to <http://www.diypestcontrolpower.com/natural->

products/.

## **About DIY Pest Control Power, LLC**

Calvin of DIY Pest Control Power said, "We are not like traditional exterminators ready to blast everything in their way with antiquated pesticides and chemicals. Combining technology and customer service, we are enablers."
