

Aging Safely Baths Announces Gel Coat Walk-In Tubs

Tyler Collins June 22, 2015

Aging Safely Baths announces the inclusion of gel coat walk-in tubs to its lineup of premium walk-in tub and shower products.

(Newswire.net -- June 22, 2015) Louisville, CO --Aging Safely Baths announces the inclusion of gel coat walk-in tubs to its current inventory of high-quality, premium walk-in tub and shower models. Gel coat is a finish that offers not only good looks in a tub or shower but also a durable and easy-to-clean finish. Using a gel coat finish on a walk-in tub means less time spent scrubbing to keep the tub clean, making it safer for users with

limited mobility.

Gel coating as seen at <http://www.agingsafelybaths.com> also helps prevent scratches and stains on any tub or shower surface and offers a slick, water-repellent coating that keeps moisture at a minimum and prevents mold and mildew from growing inside the tub or shower. Created with the latest technology, gel coating is available in a wide variety of styles and colors to suit every decorative taste.

For a limited time, gel coating and other types of walk-in tubs and showers are available at discounted prices. For example, the 30" by 53" Premium Walk-In Tub is only \$4,200 when customers order online with the promo code HY782. This tub includes water and air hydrotherapy jets, a Roman faucet and hand help shower, a drain kit, aromatherapy and free shipping. For more information about offers on walk-in tubs and showers, visit the website.
