

Renew Crew of Northwest Arkansas Offers Concrete Color

Michelle Ormiston June 30, 2015

Renew Crew of Northwest Arkansas

Renew Crew of Northwest Arkansas announces a new concrete coloring service for customers that will create a custom look at affordable prices.

(Newswire.net -- June 23, 2015) Springdale, AR --Renew Crew, a leading provider of environmentally safe outdoor and exterior surface cleaning services, is now offering customers a new concrete coloring service. This is all part of the company's state of the art three step process that includes pre-soak foam, power cleaning and a protective finish. In step one, Renew Crew's team of professionals use an environmentally friendly and biodegradable foam to pre-soak the concrete and penetrate even the deepest dirt stains.

In addition, the exclusive foam used by Renew Crew will kill any mildew or mold without using unsafe or hazardous chemicals. In the second step, Renew Crew's team pressure washes the surface and restores the original color and cleanliness without causing damage to the existing surface or surrounding outdoor features, including plants. Step three, the final step in the process, is a protective finish that adds to the natural beauty of wood and concrete surfaces and also ensures longevity by protecting the surface from weather damage, including daily exposure to ultraviolet rays from the sun. Customers can choose from matte and natural finishes to a wet look and color enhancing gloss finishes, depending on the desired look and color. The finish adds color while protecting against weather damage and ultraviolet rays. A team of well trained, professional specialists will help customers make the best choices.

Customers looking to bring back the "like new" look and feel of concrete and other exterior surfaces will find that [Renew Crew](#) offers the best quality, environmentally friendly products that not only clean, but protect, outdoor surfaces of all kinds. Whether the surface has endured years of weather damage or has been affected by surrounding vegetation, Renew Crew can provide customers with a customized plan to restore the beauty of any outdoor surface and enhance and increase the overall value of any home's exterior.

About Renew Crew of Northwest Arkansas

Renew Crew is the local source for gutter, siding, patio and deck cleaning in the Northwest Arkansas area. Their effective and environmentally friendly 3-step process lifts built-up outdoor dirt and grime to the surface and washes it away, leaving outdoor living spaces not only clean but also protected.
