

The Elite Group Introduces Drone Roofing Inspections

Tyler Collins September 15, 2015

Drones Are Able to Reach Difficult-to-Reach Roofs

The Elite Group Property Inspections, Inc. recently announced the addition of high-tech aerial camera equipment to inspect inaccessible roofs.

([Newswire.net](http://www.newswire.net) -- September 15, 2015) Diamond Bar, CA -- Chad Hett, Vice President and co-founder of The Elite Group Property Inspections, Inc., available on the web

at <http://www.yelp.com/biz/the-elite-group-property-inspections-inc-diamond-bar>, announced today that his company was now offering roofing inspections using innovative aerial drones. While basic roof inspections are typically part of the overall home inspection process, some roofs may be difficult to reach. "The drones allow the company's technicians to inspect roofs that may otherwise be inaccessible," says Chad. "We can check the condition of any roof, and our inspectors love them because they are safer to use than ladders." By using advanced technology, The Elite Group and its inspectors can perform tasks that other inspection companies do not offer, providing quality service that outpaces the competition.

The aerial drones are equipped with high-definition cameras, taking both photographs and video in 1080P or 4K resolution. The sharp images the remote-controlled devices capture can be viewed by inspectors to look for any potential damage and the overall condition of roofs. "Prospective home buyers can see for themselves how the roof looks when they view the images these drones collect," states Chad. "The drones work on any roof type, on any height of building, and can reach areas that humans may not safely get to."

The Elite Group, based in Diamond Bar, has been in business since 1984, and in that time has performed well over 350,000 inspections throughout the state of California. The company offers a wide range of inspection services to assist customers with their needs. In addition to the aerial drone roof inspections, The Elite Group performs services including termite inspections, mold and indoor air quality assessments, chimney evaluations, and home energy audits. The company has invested heavily in advanced training for their Certified Master Inspectors, giving them the tools, the training, and the knowledge to do complex inspections on any type of property. Those experts can tackle residential and commercial building inspections, and have received certification from the International Association of Certified Home Inspectors, the trade organization that helps set standards for the inspection industry. Besides aerial drones, the company has also implemented the use of other high-tech gear in their inspections, including high-definition sewer cameras to reach underground sewer lines that are commonly overlooked by traditional home inspections. Continual innovation is what makes The Elite Group stand out from a crowded industry, helping cement their position as one of the premier home inspection firms in North America.

About: The Elite Group Property Inspections, Inc., is a California-based, independently-owned inspection company that is the largest in the state. In business for over three decades, The Elite Group has performed over 350,000 inspections on residential and commercial properties throughout California.
