

MD Pain Care Voted Among Top Pain Physicians in Georgia

Tyler Collins April 04, 2016

MD Pain Care is a leading pain management specialist.

Dr. R. L. Talley Jr., MD, of the MD Pain Care Clinic in Georgia was recently ranked among the top pain medicine physicians in the state.

([Newswire.net](#) -- April 4, 2016) Conyers, Georgia -- 2016 is off to a great start for the medical director of Georgia's MD Pain Care clinic in the Metro Atlanta area. Dr. R.L. Talley, Jr., MD, was recently recognized by physician ranking site Healthgrades as being in the top nine percent of all [pain management physicians](#) in the state of Georgia. This honor

is a testament to Dr. Talley's hard work as a caring, compassionate medical care provider for his patients. "Being ranked in the top 9% is something worth celebrating," says Andrew Conaghan, a spokesman for MDPC. "Dr. Talley has a wonderful reputation in the community and it's great to see him be recognized for his excellent care." To learn more about Dr. Talley and the staff of the clinic, visit <http://www.mdpaincare.com/our-medical-staff/>.

MDPC offers a wide variety of specialized treatment options to help their patients overcome chronic pain conditions. Innovative practices like medial branch blocks, spinal cord stimulation, and facet joint injections improve patients' wellbeing and quality of life. The clinic focuses on minimally-invasive procedures to help reduce pain and improve range of motion in their patients; many pain conditions previously required complex surgeries to correct. MDPC's clinic with offices in Covington, Conyers and Monroe has an Ambulatory Surgery Center for more complex procedures and is a state-of-the-art facility. The clinic is Joint Commission accredited, ensuring quality care of the highest standards for the many patients who rely on the clinic's expert pain management services.

MD Pain Care clinics in Georgia begin treatments by assessing the specific needs of each patient in a highly personalized setting. The expert physicians and staff at the clinics are adept at finding the right treatment methods for a variety of chronic pain conditions. The goal is to determine the simplest approach first before more invasive treatment options are employed. This can mean physical therapy and preventative strategies in conjunction with procedures or medication. By using minimally-invasive techniques the patient can expect quick recovery times. "Our careful approach and step-by-step treatment strategy improves patient outcomes compared to other pain management methods," adds Andrew. "Patients report improved range of motion and the elimination of pain through our innovative treatment programs."
