

Appliance Repair Davie Florida Company Attends Trainings

Tyler Collins April 23, 2016

First Class Appliance can handle major appliance repair needs.

First Class Appliances has attended two training events to improve their services and overall efficiency.

([Newswire.net](#) -- April 22, 2016) Davie, Florida -- First Class Appliances a company providing repair, maintenance and installation services on all major

appliances, has recently attended two training events in order to boost their overall efficiency. Everything the company has gained and learned from the trainings will be applied and effectively used to better serve their customers.

First Class has more than 13 years of experience as an [appliance service repair company](#), headquartered in Davie Florida serving the tri-county area. They are licensed and insured, meeting all requirements for major condominiums, buildings, apartment complexes and yacht marines. They also consistently attend trainings and seminars to keep their technicians and office personnel up to date with the appliance industry. First Class Appliances is accredited by the BBB (Better Business Bureau) as well as the PSA (Professional Service Association).

The company is certified for most major brands of home appliances, such as Whirlpool, KitchenAid, Jenn-Air, Electrolux, Frigidaire, and high end brands like Viking, Faber, True and U-Line. They are a preferred servicer of boat owners and major brand marine appliances as well. Other services that the company offers include drier vent cleaning and home service agreements for appliances and air conditionings.

[First Class Appliances](#) attended the ASTI (Annual Service Training Institute) service training at Deauville Beach Resort in Miami Florida. It is the biggest appliance service training convention for business owners, managers and technicians. ASTI's slogan "Know More, Make More" aimed to encourage attendees to learn ways to be more efficient with their time, more analytical with their processes and more profitable in their bottom lines.

The training focused on sharing insights and ideas into how appliance service companies could make the most of their efforts every day in their business. Some of the areas that the training covered included basic electricity, basic refrigeration, service desk, customer reviews and service company growth, mobile technology to increase productivity, labor inventory management, and professional flat rate pricing.

First Class also attended the Electrolux 2016 Product Training. The focus for this training included administration, French door bottom mount refrigeration, induction cooking, laundry center, slim ice, Solaro dishwasher and top mount refrigeration. Classes were conducted in Deerfield Beach and Sarasota, Florida.

About First Class Appliances
