

Ahmet Onerbay of Icon Stone Inc. Leads Revenue Growth

Tyler Collins April 26, 2016

Presenting the highly-acclaimed Icon-Stone, Inc. board of directors

Ahmet Onerbay, V. P. of Icon Stone, Inc., assisted in the securing of a spot in the top 500 fastest growing companies during the latest recession.

([Newswire.net](#) -- April 25, 2016) Santa Fe Springs, CA --Ahmet Onerbay led Icon Stone, Inc. to rank in the top 500 fastest growing firms

in the United States during the latest recession in 2010. His tremendous efforts not only saved the company, but also made it one of the leading natural stone suppliers in the world in the present.

Onerbay became the vice president of Icon Stone in 2009, right when the US economy started crumbling. Since the company is a provider of natural stones for construction, it was badly affected by the real estate crash. Icon Stone was struggling and on the verge of bankruptcy. The company was going to keep heading that way until Onerbay decided that something had to be done.

Onerbay put in a lot of effort into figuring out how to save the company. He started reading books about bad economy, recession and even success stories of different companies. This led him to acquire relevant insights and useful information about the recession and how to keep a company from going down. He then made some very difficult and important choices, which made Icon Stone Inc. the successful company that it is now. The company would not have withstood the challenges of the recession if not for Onerbay's strong determination and hard work.

After surviving the 2010 recession, [Onerbay](#) continued to work hard and worked even harder every single day to strengthen and expand the company as well as enhance its productivity. Icon Stone is now a leader in the natural stone supply industry.

Icon Stone currently has three natural stone quarries overseas and two natural stone factories, with one being in Burdur, Turkey. Their facility in Turkey has a production capability of 750,000 square feet or the equivalent of 100 containers every month. Their expansion has enabled them to employ hundreds of workers in Europe and the United States.

The company's own quarries have allowed them to provide their customers with natural stones in superior quality. Their focus is to provide high quality natural stone tiles, moldings, pavers, and handcrafted mosaics in an unrivaled variety of colors and patterns. Their travertine stones come in different types including autumn leaves, noche toros, chocolate brown, cordoba cream, imperial platinum or gold. They also offer cappuccino, beige or crema nueva marble stones. The company supplies natural stone sinks as well.

[Icon Stone Inc.](#) distributes to customers in the United States, Canada as well as Mexico from their warehouse located in Los Angeles, California.
