Magnesium is believed to be one of the most important minerals in the body. This magnesium oil spray with aloe vera could deliver therapeutic benefits directly via the skin.

(Newswire.net -- January 17, 2017) Orlando, FL -- Aloe vera is one of the most popular natural remedies available today. It has long been believed to be therapeutic due to its medicinal properties.

Aloe Vera is potentially a safe and effective remedy against muscle pain and inflammation. It is known to be the mother of all naturally-occurring therapeutic plants today.

It normally grows in arid climates and is used as an herbal medicine. According to some experts, consumption of aloe vera supplement could potentially aid in fighting inflammation.

It can work as a strong anti-inflammatory and help cells function properly. This is believed to be helpful in achieving and maintaining healthy muscles and joints as well as offer relief to joint and muscle pain.

This healing plant has also been thought to aid in certain ailments and symptoms, such as sore muscles, osteoarthritis, and rheumatoid arthritis.

The anti-inflammatory properties of aloe vera are also present in anti-inflammatory medications. The difference is that this aloe vera is all-natural, and it is not linked with side effects.

According to some experts, this medicinal plant can be assimilated as well as utilized by the body naturally. This is one of the few reasons why the body doesn’t react negatively towards it, unlike pharmaceutical drugs that contain foreign materials.

Inflammation normally causes pain, and it is usually caused by an enzyme called cyclooxygenase-II or COX-2.

The article “Aloe Vera, Hydrocortisone, and Sterol Influence on Wound Tensile Strength and Anti-Inflammation,” reveals that this plant contains a natural cyclooxygenase (COX-2) inhibiting effect.

These effects are thought to help reduce fever, pain, and inflammation that affect the muscle. The natural remedy does so without producing harmful effects linked with the use of COX-2 inhibiting drugs.

Nonsteroidal anti-inflammatory drugs (NSAIDs) are Cox-2 inhibiting drugs. Unfortunately, these medications cause side effects. Thus, it is not surprising that many people use the natural cyclooxygenase (COX-2) inhibiting effect of aloe vera.

An article by Boudreau and Beland in the issue of the Journal of Environmental Science and Health, reveals that over one-third of the population in the United States utilizes some sort of alternative medicine.

It is also worth mentioning that aloe vera possesses glucomannans. These are special cell-surface receptors that work by repairing damaged tissue.

There are many ways to take advantage of the healing effects of aloe vera. One is to use a magnesium oil spray with aloe vera.

Magnesium is believed to be one of the most important minerals in the body. This magnesium oil spray with aloe vera could deliver therapeutic benefits directly via the skin (http://www.amazon.com/Aloe-Magnesium-Oil-Spray-Transdermal/dp/B01CRNYI2I).
