D-Mannose has been found to offer protection against lectins, which are a type of protein that is found in seeds, beans, grains, vegetables, fruits, and seafood.

(Newswire.net -- June 7, 2017) Orlando, FL -- D-Mannose has been a quite popular all-natural alternative against urinary tract and bladder infections. However, this unique sugar has also been found to be useful in fighting other symptoms and conditions.

D-Mannose is believed to be useful against lectin-related reactions, which include weight gain, irritable bowel syndrome, inflammation, and even colon cancer.

Vivo and in vitro studies reveal that D-Mannose serves as a decoy molecule. It works by binding with certain allergenic compounds or irritants, which would otherwise bind to mannose sugars on cells. Thus, this results in the reduced likelihood of lectin-related reactions.

D-Mannose has been found to offer protection against lectins, which are a type of protein that is found in seeds, beans, grains, vegetables, fruits, and seafood.

It has been found that lectins are found in 30% of the American diet. It is further worth mentioning that they are neither degraded by stomach acid nor proteolytic enzymes. This has been thought to make them virtually resistant to digestion. Experts further suggest that microbes carry lectins and utilize them for host cell attachment.

Aside from having the potential ability to block lectins, D-Mannose may also aid in inhibiting lectins from breaching the intestinal walls.

Using supplements is widely thought to be one of the best ways to take advantage of the possible effects D-Mannose may offer. One formula worth considering is Divine Bounty D-Mannose capsules, which have been widely believed to be safe, potent, effective, and pure.

According to Divine Bounty, D-Mannose capsules contain 600 mg of D-Mannose powder. This formula has superior potency considering that other brands only offer 500 mg of D-Mannose powder or less. It is further worth mentioning that every capsule contains added ingredients such as cranberry juice powder and dandelion extract.

Divine Bounty D-Mannose formula offers 120 capsules per bottle, while other brands only provide 60 capsules. It is a great value for money since consumers do not have to reorder and spend more of their hard-earned money to utilize the potential effects of this natural alternative.

Every capsule is formulated to help maintain a healthy urinary tract and fight infections. It may be an excellent way to strengthen the urinary tract and bladder health as well as reduce the risk of infections. There are many consumers who prefer this formula not just due to its potency, but also purity.

This formula doesn’t contain GMO, stearates, soy, gluten, silicone dioxide, or artificial ingredients, which many consumers are trying to avoid. It also comes with a customer satisfaction guarantee that provides consumers with a risk-free transaction with Divine Bounty.
