Sloan Hybrid Urinals with Jetrinse Solution Technology offer highly efficient liquid waste removal using only 100 gallons of water annually.

“We are always on the lookout for ways to improve the lives of our commercial and residential customers,” according to Rudy Mahalik Jr., chairman of PDM Plumbing, Heating & Cooling. “When a respected company like Sloan comes up with a product that is environmentally friendly and significantly lower in cost to operate than traditional systems, we want our customers to know about it and be able to have it installed in their facilities.”

Sloan offers Hybrid Urinals with Jetrinse Solution Technology in three designs to accommodate various applications in hotels, schools, transportation terminals and facilities, restaurants, office buildings, stadiums, arenas and other commercial facilities. The new designs address concerns about odors and clogs that can develop when high-efficiency urinals are not properly maintained.

Dissatisfaction with water-free urinals was caused by solids building up and impeding flow through drain lines. The issue was resolved with incorporation of Jetrinse Solution Technology into the fixtures. The technology eliminates the need for cleaning drain lines or scrubbing to remove calcite formation and buildup by automatically cleaning the fixture’s housing and drain every 72 hours. This makes them five times cleaner than conventional, flushing urinals.

PDM Plumbing, Heating & Cooling has built its 132-year reputation as one of the best commercial plumbers in Illinois by coming up with solutions to the problems faced by its [commercial plumbing](#) customers. Buildings and facilities modernizing their existing restrooms need fixtures that can be quickly and easily installed to replace traditional urinals.

The Sloan retrofit hybrid has all the features of Hybrid Urinals with Jetrinse Solution Technology and can be installed using the supply stop already in place as the water source for the new fixture. Between these new fixtures and the skills of PDM technicians, bringing an older building into the 21st century was never easier, and the [fixtures](#) comply with Americans with Disabilities Act guidelines.

To learn more about the commercial water saving urinal offered by PDM Plumbing, Heating & Cooling, visit their website at [www.pdmsince1885.com](http://www.pdmsince1885.com) or call 1-815-726-6264.
