

Dr. Earl Bergersen, Recognizing A Chicago World Changer

Kathie Turner July 25, 2017

Humanitarian Award 3.5 million treated, introduces children's appliance & unveils Dr. Bergersen Assessment projecting future growth and development.

([Newswire.net](#) -- July 25, 2017) Winnetka, IL. -- **Ultimate Lecture, disruptor and former Northwestern Dental School Professor comes back to train and educate dentists and orthodontists to use his system that has treated over 3.5 children around world addressing improper oral habits with an impact on sleep and the airway to alter and arrest growth and development. Patented, removable appliances correct these habits for better life-long health.**

The 50th. Anniversary Lecture, August 4th. and 5th. at Chicago's Northwestern University is in tribute to and a homecoming for genius inventor, professor and 'World Changer.' Dr. Earl O. Bergersen DDS, MSD, ABO. Bergersen has spent decades advancing research and developing highly patented Orthodontic and Orthopedic appliances, creating a treatment system that targets children between 2- adolescents, to guide and correct habits and health through the growth phase.

Professor, Bergersen, is back in class this week to train and certify doctors on; *The Hottest Topic in the Dental World-> 'SLEEP.'*

Bergersen's life-changing treatment is based on innovation backed with his current 514 US and International Patents. This lecture embodies exclusive and proprietary elements, of nearly impossible standards, to meet what dentists and orthodontists might dream to experience in a continuing education class. The doors are open for Northwestern Alumni, former dental students and newly aware doctors and staff to learn the protocol developed while treating over 3.5 million children around the globe. SEATS are still available!

50 Year Anniversary Lecture

Doctors never stop learning. This lecture includes the case work of dentists from across the US and international distributors from several of the 37 countries that provide this treatment. Some countries, such as Finland, have conducted substantial research projects reflecting sustained results for over a decade. (The Finland Research is one of the world's largest orthodontic studies, following children for over 15 years.)

Bergersen has consistently pushed with an organically disruptive force, in the orthodontic world and never took 'NO' for an answer. Evidence based and with the logic of what he saw in his own private orthodontic practice in Winnetka for 37 years, *"Bergersen has become the most prolific developer of patents since Thomas Edison."* CEO, Leslie

Stevens. Dr. Bergersen's appliances have been proven to address and correct the underlying conditions or symptoms of Sleep Disordered Breathing in Children, if they are treated while they are young and still growing.

Doctors want the cutting-edge technology- to rejuvenate and excite themselves and their practice. They open their mind to new advances in the medical field to fire their engines and provide new and better care for their patients.

HealthyStart™ will unveil the first ever industry measurement, the Bergersen Assessment Scale, to project future dentition based on 50 years of privately held case data.

Another Breakthrough.

Ortho-Tain® HealthyStart™ will introduce the latest in advanced orthodontic/orthopedic appliances. The **'Max A™**, that directs the upper arch to move in a forward direction to promote growth, improve the profile and encourage the development of the airway.

Effect of Mouth Breathing

Reconfigured for open mouth breathing

1/2 inch of open mouth, closes oropharynx 6 mm.

An Education Leader; The

Ortho-Tain® (1967) HealthyStart™ company has been at it for 50 years, so Happy Anniversary! Founded by a board-certified and Angle Orthodontist and 25-year professor at Northwestern University Dental School, Dr. Earl O. Bergersen DDS, MSD, ABO, has delivered well over 500 seminars internationally, written an Orthodontic Text book in Italian, has registered 80 monographs and has been published over 80 times. Dr. Bergersen was President of his Dental Class (1955) Chairman of the Orthodontic

Alumni (1965) and Member of Omicron Kappa Upsilon. Dr. Bergersen leads in removable appliance development and in the study of children and Sleep Disordered Breathing. Bergersen has been producing continuing education courses for so many years, that according to Ortho-Tain® CEO, Leslie Stevens, the P.A.C.E. program requested that Ortho-Tain® provide guidance in the development of their program many decades ago. Dr. Bergersen has consistently delivered on classes that set the standards for dental and orthodontic excellence and innovation on several continents.

A once in a life-time tribute to a life-time of contribution. The best science and treatment, become the industry benchmark for the practice of dentistry. This is continuing education that cutting edge dentists and orthodontists will invest in on many levels targeting professional aspirations and practice goals.
