([Newswire.net](#) -- January 17, 2018)  
Roswell, Georgia -- Corporate Transportation, Inc., was established in 1988, in Roswell, Georgia. Fast-forward to 2018, and the company known for its world-class service is celebrating its 30<sup>th</sup> anniversary as a business.

February marks the anniversary of the company in the business and individual transportation industry, and the transportation firm has continually expanded both its fleet and its range to suit client needs. CT is also one of only three women-owned transportation companies in the state of Georgia. “We are proud of the achievements and growth of our company over the past three decades,” says a spokesperson for the professional transportation provider. “Our customers are central in making us the industry leader we’ve become since we first opened our doors.” To learn more about the company and its history providing Atlanta area car services, visit <http://www.corporatetransportation.org/aboutus.php>.

Not one to rest on its laurels in this highly competitive field of operations, the company has added vehicles, services and technology to its roster. It recently rolled out a smartphone app to help clients book reservations with ease. The app, available for Android and Apple devices, allows riders to track drivers on a real-time map, call drivers directly from the app, see ride prices and make payments as well. It even offers real-time flight tracking for travelers flying in and out of airports serviced by CT. This level of functionality helps the company’s app stand apart from competitors. Booking rides with the company, including transportation services to concerts, sporting events, airports, group tours and corporate travel, has never been easier or more efficient.

In addition to gearing up for transportation services for the 2018 Masters Golf Tournament at the Augusta National Golf Club in Augusta, Georgia, CT is planning expansion of its services to cities throughout North America. Starting in Atlanta and suburbs, the company, based in Roswell, Georgia, began to serve business and individual clients in parts of surrounding states, including Florida, the Carolinas, Alabama and Tennessee. Adding nationwide professional transportation services has been part of the company’s core goals since its inception. “We’re targeting major cities in the United States and in Canada for expansion,” adds the CT company spokesperson. “Each city’s clients will enjoy the same impeccable service and safety we’ve built our foundation upon.”

Corporate Transportation operates a fleet of quality vehicles, including passenger sedans and SUVs as well as multi-passenger stretch limousines and three vintage Rolls-Royces for special events. Larger vans, mini buses, and a luxury limo bus complete the range of options that clients can select from. “Whether you are in town for a conference or want a special night on the town with friends and family, our professional chauffeurs deliver quality, service, and safety,” adds the spokesperson. For more information on the range of services the company provides to its clients, visit their website at <http://www.corporatetransportation.org/index.php>.
