

NYC Midtown Center for Sleep Gets Healthy Start Certified

Susie LaFredo, Healthy Start Marketing February 08, 2018

9 out of 10 Kids Suffer from the Symptoms Related to Sleep and Breathing Issues

The HealthyStart® System helps us address and treat sleep and breathing issues in kids. Come in to Elite Dental Arts for a free Dental and Sleep Assessment.

(Newswire.net -- February 7, 2018) New York City, NY -- **The number of children affected by sleep, breathing and**

obstructive airway issues is astounding. Unfortunately, these children will more than likely be plagued with health issues as adults. HealthyStart® by Ortho-Tain® has a dynamic oral appliance system that not only identifies and evaluates the problem, it treats the root cause. For these reasons, **Dr. Nick M. Mobilia, DDS has extended his services to include offering the HealthyStart® System to the children in his community through his practices Koala Center for Sleep Disorders, Midtown and Elite Dental Arts in New York City, NY.**

As the only Certified office in NYC , Dr. Mobilia states, “Understanding firsthand the health problems an adult with sleep and breathing issues face, integrating the

HealthyStart® Appliance System into our practice for Pediatric Patients is a no brainer”.

According to statistics, pediatric sleep and breathing disorders potentially affect over 40 million children . The identification of Sleep Disordered Breathing (SDB) is important. Evidence shows that sleep disorders interfere with physical, cognitive, emotional and social development. Symptoms include, but are not limited to, ADD / ADHD, learning difficulties, behavior issues, restless sleep, headaches, bed wetting, night terrors and swollen tonsils and adenoids. Many times, these symptoms are misdiagnosed or left untreated.

HealthyStart® by Ortho-Tain® is a 50-year company that has treated over 3.5 million cases around the world . Ortho-Tain developed the multi-faceted HealthyStart® Appliance System as a treatment that addresses the underlying root cause of Sleep Disordered Breathing. Treatment with the HealthyStart® System identifies, evaluates and addresses the airway, oral habits and improper growth and development of the pediatric patient. When started in the early growth stages there are more permanent results. This child does not have to face the same fate of health problems as the adult patient with sleep, breathing and airway issues. The icing on the cake? Straight teeth, no braces.

Education is key for both parents and doctors . Dr. Mobilia has extended his knowledge of assessing and treating pediatric airway and sleep and breathing related disorders (SBRD) with the HealthyStart™ System as a Certified Provider.

February is National Children’s Dental Health Month !

As a launch to the HealthyStart® program, Dr. Mobilia will be hosting ‘Healthy Start Fridays’. Every Friday throughout the month of February, parents can bring their children into Koala Center for Sleep Disorders, Midtown or Elite Dental Arts for a free Dental / Sleep and Airway Assessment. Space is limited!! **Call (917) 935-4793 or (212) 681-0939 to schedule an appointment for your child.**

Do not wait. There is nothing to lose and everything to gain for the health of your child!
