

# Author's Research on Morgellons Gives Hope to Millions of Lyme Disease Sufferers

Elle Jane March 07, 2018

Richard Kuhn B.S.Ch.E. has twenty years of experience working with thousands of sufferers and is considered one of the world's leading experts on skin parasites and the complications brought on by Lyme disease.

**According to author Richard Kuhne, new research has uncovered a link between Lyme disease and Morgellons which helps patients find new treatment options to battle the chronic disease.**

([Newswire.net](#) -- March 7, 2018) -- Each year, there are over 300,000 new cases of Lyme disease in the U.S. as reported by the CDC but new research from author Richard Kuhns B.S. Ch.E. is leading the way in giving hope for better treatment options for those who suffer with the symptoms of Lyme disease.

In his book, "How To Get Your Life Back - Unraveling The Connection Between Chronic Lyme And Morgellons Disease", which is based on his own personal hell with the parasitic organisms that cause [Morgellons disease](#), Richard brings new information and cure options to light. He was one of the first to suggest the connection between Morgellons and Lyme's disease which has since been proven in both lab tests as well as peer-reviewed published studies in 2017.

Morgellons disease has been branded the Delusional Parasitosis (DP) disease and sufferers have been told it's all in their head yet lab tests have found that 98% of Morgellons sufferers share an infection with *Borrelia spirochetes*, especially *Borrelia burgdorferi* which is present in Lyme disease. This information coupled with a special diet he has developed called the King Diet<sup>SM</sup> has led Richard to become one of the world's leading authorities on dealing with both Morgellons and Lyme disease.

Richard's in-depth research reveals:

- What special diets and supplements help alleviate the pain, itching and biting associated with both Morgellons and Lyme disease.
- Why Candida, bacteria, fungus and parasites are compromising the immune system and why it's imperative to balance the diet to control the infection.
- What simple and basic nutrients the body is starving for that fight both Morgellons and Lyme disease even doctors don't know about.
- The importance of cleaning and penetrating the deeper layers of the skin by using state-of-the-art nano technology.

According to Richard, "The public is vastly unaware of the many up-to-date treatment options available because most doctors do not specialize in treating Lyme disease so they are navigating a slippery slope with their health. I've tried to make this information easily obtainable to everyone so that they can end the suffering and misery associated with the effects of Lyme disease."

The book, which is in its 8th printing, has been continually updated since 2006 as the latest information becomes available. He says, "Having the most up-to-date information is key in [treating Lyme disease](#) before it becomes chronic."

Richard Kuhn B.S.Ch.E. has been at the forefront in legitimizing Morgellons disease and has twenty years of

experience working with thousands of sufferers and is considered one the world's leading experts on skin parasites and the complications brought on by Lyme disease.
