Know the Ins and Outs of Urinalysis

Therese Morris July 29, 2018

HealthyWiserâ„¢ Complete 10 Parameter Urinalysis Reagent Strips tests does as it also provides details regarding glucose, protein, pH, leukocytes, nitrites, ketones, bilirubin, blood, urobilinogen and specific gravity.

Conducting at-home DIY urine tests is the quickest and easiest way of knowing if there's an issue to be concerned about or not, prior to a doctor's visit.

(Newswire.net -- July 29, 2018) Cheyenne, Wyoming -- Oxygen, hydrogen, helium and nitrogen are just a few of the most familiar elements widely recognized to even the most medically uninformed person but their derivatives are frequently less spoken of. In the human body, there is a chemical derived from nitrogen and oxygen combination called nitrites and it's capable of indicating a urinary tract infection (UTI) before it gets too far along. Being able to detect nitrites in urine is a sure way of identifying an infection so the earlier it is found, the better for one will have a good forearmed with information on the matter.

“The presence of nitrites in urine most commonly means there’s a bacterial infection in your urinary tract,” explains Healthline.com. “This is usually called a urinary tract infection (UTI). A UTI can happen anywhere in your urinary tract, including your bladder, ureters, kidneys, and urethra. Harmful bacteria find their way into the urinary tract and reproduce rapidly. Some types of bacteria have an enzyme that converts nitrates into nitrites. This is why the presence of nitrites in your urine is an indicator that you may have a UTI.”

Noting the chemical trail of a urinary tract infection is just one of the numerous things the HealthyWiser™ Complete 10 Parameter Urinalysis Reagent Strips test does as it also provides details regarding glucose, protein, pH, leukocytes, nitrites, ketones, bilirubin, blood, urobilinogen and specific gravity. Having such an in-depth view of what’s going on within is always a great start for healthy self-assessments and a prelude to a doctor’s visit.

“I like these test strips because they are easy to use, and they provide a chart inside to let you know what each square is checking for,” verified HealthyWiser™ Complete 10 Parameter Urinalysis Reagent Strips. “Great for anyone who just might want to check to see what’s going on. It’s also great for other health professionals and students. They are also inexpensive, and had fast shipping. I got these for a friend to check if they could possibly have a urinary tract infection (UTI). As a medical laboratory technologist I defiantly would recommend these urine analysis test strips and for health students.”

The broad scope analysis that the HealthyWiser™ Complete 10 Parameter Urinalysis Reagent Strips kit is quite impressive and customers are really appreciative of the quality provided paired with how cost effective it is. Start learning more about what’s taking place on the inside by conducting frequent urine sample tests reliably from the comfort of one's home.
